

You Can Now Buy the SB Coin on Binance DEX Exchange

London, Jun 14, 2020 ([IssueWire.com](https://www.issuewire.com)) - Summary

Before the SB Coin could only be bought and sold on the SBCM exchange. However, the latest listing on Binance DEX exchange ensures that even more people can access the coin. It will lead to the growth of the ecosystem and the growth in the value of the SB Coin.

The [SB Coin](#) can now be bought and sold on the [Binance DEX](#) exchange. Any trader with an account on the Binance DEX Exchange can buy and sell the SB Coin using the USD. Besides that, the token is paired with other crypto coins such as the BNB.

The Binance exchange is one of the large crypto exchanges and all its benefits will now be available to SB Coin holders. These benefits include a dedicated security infrastructure, high liquidity, and decentralization.

As many people continue to understand the unique value proposition of the SB Coin, trading volumes on the exchange will rise. It will help to open up and grow the SB Coin ecosystem a great deal. With the listing, it will make it possible to achieve the goal of supporting all businesses such as the taxi sector, e-commerce, online gaming, and hotels.

Besides the passive income earned by the SB Coin ecosystem, the team has been working on several premium features, which will help to grow its functionality. The result is that the demand and value of the SB Coin will continue to grow.

How the SB Coin Works

The SB Coin was built as a global payment coin for the SBCM ecosystem. It lets traders buy or sell the SB Coin to make a profit via the POS system. Currently, over 200 merchants around the world accept the SB Coin.

SB Capital Management backs the SB Coin. An investment company has interests in numerous industries such as hospitality, real estate, capital sector, and travel sector. SBCM has incorporated

blockchain technology into all processes to ensure everything occurs smoothly and at a reduced cost.

The use of blockchain technology will help to eliminate third parties such as credit card companies, banks, and payment processors such as PayPal. It makes it possible to carry out transactions over the internet without the need for a third party to secure them. SBCM harnesses the power of the blockchain to offers users of the ecosystem numerous benefits such as:

- Transparency
- Reliability and availability
- Immutability
- Increased speed of transactions
- Ability to transact tangible and non-tangible assets
- Reduced costs by eliminating intermediaries

SBCM also launched the SB Coin on the blockchain as well as the SBCM exchange. Investors can now buy the dip and sell the peak for a profit with the SB Coin. The SB Coin powers all transactions within the SBCM ecosystem. Besides that, the coin has helped to reduce the risk of fraud. SBCM is working on combining the SB Coin with modern technologies to offer value to all participants in the ecosystem.

A Use Case for the Hospitality industry

Currently, the hospitality industry is reliant on payment processors such as MasterCard, VISA, AMEX, CUP, JCB, and others. The use of these cards has also led to the prevalence of fraud in the sector. On average, around 0.6% of all transactions globally using cards are fraudulent. In some countries, the figures are quite high.

By using the SBCM ecosystem, various intermediaries are eliminated from the hospitality sector. The result is reduced cost as well as the elimination of fraud. SB Coin ensures transparency and reliability during all transactions that take place within the SBCM ecosystem.
