Coupled with a higher level of imagery, the author aims to stretch readers' imagination in a saga.

Dreamberries

Kenneth A Marston

Pittsburg, Jun 9, 2020 (IssueWire.com) - [Dreamberries](#) by Kenneth Marston is a fictional play of the author's mind in a bizarre, eerie, and peculiar moment encapsulated in a saga. Kenneth elevates another kind of imagery that is a symbol of a berry: enabling the ability to cause the person to eat them to travel through time. With the innovative use of the literary device, readers will surely love the revelations and adventures the book has offered.

"As characters move through the plot of Marston's novel, they occupy the bodies of others in this time traveling fantasy. With the ability of the author's time travelers to go from male to female and back again, he does a good job of keeping their many identities straight in what otherwise might have been a confusing trapeze through the centuries. The plot moves rapidly as James and his companions search for evidence to convict the Sullivans. The premise is intriguing as there is not only a fantasy element to the novel but also an aspect of the supernatural, which is handily tied into the physicality of time travel. This novel "the first foray into fiction by the author" shows an ambitious scope of ideas and a unique take on the time travel genre. It is a many-faceted work that delves into such themes as extraterrestrials, the vast potential of the mind, and medical experiments," says Michael Radon of US Review of Books.

Kenneth was born and raised in Massachusetts and has lived in New Hampshire, Maine, Vermont, and New Jersey. He has an Associate of Arts Degree in Liberal Arts. His first book, *Dreamberries*, took him eleven years to finish. His second book, *What Are You Scared of Now? Overcoming Phobias and Life's Anxieties*, was an autobiographical book about his struggles with many phobias and how he defeated them. Lastly, his latest book, *Bear on the Stairs*, shares an illustrated biographical book about his son, Neill, who suffered from Asperger's Syndrome.

Neill, my only son, died in a freak car accident in 2000. He drew, wrote poems and short stories, played the guitar and became a computer geek. After he died, I decided to try my hand at writing. This book, Dreamberries, took me at least ten rewrites and eleven years to complete. My love for writing has blossomed over the last decade. I originally submitted a three paragraph short story to my writing teacher. She read it and told me that it would make an interesting book. Voila! I sincerely hope that you as the reader enjoy this tale. It amazes me how the book came to its conclusion. After ten years and a few months, I concocted the perfect ending. Hopefully, nobody guessed the entire ending! This is my first book! Enjoy and thank you!
