**Dera Bassi, Jul 24, 2020 ([Issuewire.com](http://Issuewire.com))** - Avon Meters Pvt Ltd, a renowned Indian brand of healthcare devices, has stepped further to aid the nation in the fight against COVID-19. Avon Meters has launched an excellent range of [Infrared Thermometers and Pulse Oximeter](#) that is 100% manufactured in India while stringently following the 'Make in India' and 'Local for Vocal' initiatives.

The Infrared thermometers by Avon Meters Pvt Ltd are non-contact and CE, ROHS, FDA certified thermometers. These high-accuracy IR thermometers feature large backlit display, high-temperature alert mechanism, ultra-fast measurement capability and have batteries included. These IR thermometers come with the one-year replacement warranty.

Avon Meters Pvt Ltd is an innovation-oriented company with immense experience of 25 years in manufacturing excellent healthcare products. These IR Thermometers and the Pulse Oximeter are the epitomes of their incredible expertise. Incorporated with the advanced technology, Infrared Thermometers can accurately measure the temperature of a human body by receiving the infrared energy emitted from the forehead of the human body.

The IR thermometers by Avon Meters Pvt Ltd are non-touch 3-in-1 digitally equipped for different levels of temperature. These [Infrared Forehead Thermometers](#) have been explicitly designed for easy-handling while measuring the body temperature through the forehead. They can measure the temperature of the human body, objects, and room-temperature also.

Avon Meters Pvt Ltd has developed these state-of-the-art certified Infrared thermometers in accordance with the requirements in the wake of COVID-19 pandemic. They have an in-built fever temperature alarm system to alert you instantly if your family member or colleague is having a body-temperature similar to fever condition. Also, they have memory recall capability of showing 30 last temperature readings.
