

Blend into an Immersive Virtual Experience of Art and Freedom at Joaquin Restrepo's Exhibition "Amor Fati"

Florida City, Jul 20, 2020 ([Issuewire.com](https://www.issuewire.com)) - Contemporary artist Joaquin Restrepo launched his solo exhibition "Amor Fati" in the United States to find freedom amid the pandemic. A thematic idea resonating with his immersive art, he is utilizing the freedom of creative choices and expressing his insights through the virtues of the exhibition.

Restrepo's work talks about oppression, loving fate, seeing freedom within, and moving forward in the constant volatility of life and existence. Since the beginning of the quarantine, the contemporary artist has relentlessly composed and constructed new contemporary art through which he expresses the dire indispensability of extracting goodness from everyone. "Amor Fati" is inevitably a virtual exhibition, launched in the times of the pandemic and is an invitation to introspection, to be able to grow in the process and self-knowledge. The vision of the artist shows how we can continue and be better during difficult times through his exquisite art. The exhibition was planned to open to the public during the summer of 2020, at the Lake County Museum of Art in Florida, nevertheless, given the closings of international flights, Restrepo together with the museum decided to reinvent his proposal and present the message of his works in the digital world.

According to Joaquin Restrepo, the present time should be utilized in deciphering the true meaning of freedom and conquer our fears and demons that hold us back from attaining true liberation. From a very young age, Restrepo grew up with a knack for mixing art and technology, two of his great passions, as a

way to explore a new world through a universal language. Born in 1984 and at the age of 19, he started his artistic career. His works have been exhibited in the United States, Mexico, Colombia, and Asia.

The “Amor Fati” exhibition can be visited free through iOS devices (iPhone and iPad) and Android by downloading it from the respective app stores (AppStore and GooglePlay).
