

Blitzalytics Announces Release of the Prospect Encyclopedia

700+ NFL scouting reports and in-depth analysis of the last 3 draft classes.

Las Vegas, Jul 14, 2020 ([Issuewire.com](https://www.issuewire.com)) - The first company to fully integrate NFL-style scouting reports with sports analytics brings you a one-of-a-kind guide covering the top 700+ players over the last three draft classes who have started no more than twelve NFL games. [Blitzalytics](https://www.blitzalytics.com) is a collection of scouts, data analysts, and researchers, trained by some of the biggest names in the football industry, who aim to bring you unique data, content, and products. The NFL Prospect Encyclopedia is the only place to find information and analysis on young players, from popular rookies to unknown players fighting for roster spots. This guide was written by Blitz's top eight football scouts, who have combined to cover, interview, and report on thousands of NFL prospects over the years.

"Resources like this guide are invaluable when it's time to write 1500 words on the Raiders but I've forgotten who Brian Edwards is, or when Seattle radio calls and I can't recall specifics about Jordyn Brooks, or when I am planning Giants features and wondering if Xavier McKinney will be worth an interview request. It's smart, specific, detailed information I can trust, even when it contradicts the draftnik hive mind. Make that ESPECIALLY when it contradicts the draftnik hive mind." - [NFL Writer Mike Tanier](#)

The prospect encyclopedia delivers in-depth player analysis, as well as 22 prospects per NFL team, but also offers current and future player grades, projected depth charts, season previews, rankings, and more. From hardcore fans wanting to grow their team knowledge to fantasy football dynasty players who need to gain an edge to NFL Draft fanatics looking to fill the void, this guide delivers on every level.
