

Cooler Company Offers Vaccine Transport Solution

Toronto, Jul 8, 2020 ([Issuewire.com](https://www.issuewire.com)) - Chilly Moose Ltd. is a family-owned small business located in Schomberg, ON. They are dedicated to providing high-quality coolers and drinkware to Canadians. They now offer a solution for vaccine and medical sample transportation during the current Covid-19 Pandemic.

Partnering with 360 Medical Inc.- a Canadian pharmaceutical and medical fridge and freezer supplier- these 25L to 75L coolers, commonly used for food and beverage transport offer a new and reliable

solution to safely transport sensitive pharmaceutical and medical material. Assisting in a cold chain vaccine transportation system, the Chilly Ice Box will keep the desired material at a reliable consistent temperature, to prevent the risk of spoilage during transport.

Medical equipment is becoming more essential than ever. With supplies running low innovative solutions are needed. By using everyday products that are more readily available to the public and private sector it's possible to prevent the expiration of life-saving medicine and supplies.

Most medical and pharmaceutical material- such as vaccines- can only be unrefrigerated for a maximum of two hours in an emergency situation. When a vaccine is found for the current Novel Covid-19 Virus, it will need to be manufactured and distributed quickly all over Canada and the world. And with the current and future medical equipment shortages, the solution lies with small Canadian companies like Chilly Moose.

The 25L-75L Chilly Ice Box is constructed using heavy-duty rotomolded technology, with 40mm of pressure-injected insulated walls giving the cooler maximum temperature retention and stability. The form-fitted interlock lid system offers guaranteed safety and security for items during transport. The Chilly Ice Box offers an ice retention limit of 3-5 days, having one of the highest ice retention time frames for coolers available on the market today.

As the pandemic progresses, our lives will change every day. Borders are closing and access to foreign products is becoming more difficult. We can take comfort in knowing that we can rely on Canadian companies like 360 Medical Inc. and Chilly Moose Ltd. to supply Canadians with the products needed to keep us safe.
