

GCS Hospital reaches the milestone of treating 2000+ COVID Patients

Ahmedabad, Jul 28, 2020 (Issuewire.com) - As we are facing the COVID19 outbreak, GCS Hospital is at the frontline in the fight against COVID19 while its medical teams — doctors, nurses, technicians, and support staff — are working around the clock to treat patients and take care of them. GCS Hospital has been a ray of hope for not only COVID Patients but also non-COVID Patients. GCS Hospital was operational during the nation-wide lockdown too, so that treatment of Non-COVID Patients does not stop. GCS Hospital's COVID Wards has treated more than 2000 suspected and positive COVID-19 Patients successfully, which is a fabulous achievement for a private trust Hospital. Since the start of the pandemic, GCS Hospital has been designated as a COVID-19 facility. GCS Hospital has allotted separate entry, separate staff, and wards for treating COVID Patients. It is also being taken care of that all patients get new clothes, bed-sheets, timely medications and treatment, books for reading, etc. to make them comfortable. Patients' diet is being highly taken care of by the Diet and Nutrition Department of Hospital. Patients get healthy meals, breakfasts, snacks, hot water, milk etc. throughout the day to help them recover faster. As per the guidelines and packages laid by AMC, GCS Hospital is giving treatment to COVID Patients completely free. Airy and Huge infrastructure of the hospital, supportive staff, and facilities help patients feel positive. The patient's relatives stay anxious due to COVID. To resolve that Hospital has started a helpline which calls patients relatives and explains to them the health condition of the patients and solves their queries if any.

About achieving the milestone of treating more than 2000 COVID Patients, Dr. Kirti Patel (Director – GCS Medical College, Hospital and Research Centre) says – “Currently, 386 beds at GCS Hospital have been allocated for treating COVID Patients for which our doctors, nurses and all the staff are working round-the-clock to provide the best care and treatment. Medical Officers, Anaesthetists,

Microbiologists, Paramedical Staff are readily available to handle all kinds of patients. GCS Hospital is also been providing treatments to all Non-COVID Patients with utmost care and safety precautions since the time of lockdown.”

Ms. Neha Lal (Sr. General Manager – Operations and HR) says, “Operational since 2011 with charitable Endeavors, GCS Hospital is committed to providing the best treatment to all kinds of patients. As patients’ numbers are increasing day-by-day due to COVID Pandemic, we have started a unique helpline for patients’ relatives in which our staff calls the relative and discusses the patient conditions and treatment and also answers the queries raised by the relatives. We have also started a dedicated COVID help-desk at Hospital to caters to all COVID-related queries by hospital visitors. This unique initiative has received a fabulous response from patients and relatives as it provides mental support as well as relieves their stress and anxiety. We also consider various feedbacks and suggestions given by patients to continuously improve our services.”

Testimonials of a few patients treated at GCS Hospital

Mr. Krunal Patel – My father Mr. Vinodbhai Patel was having symptoms like cough, high fever, weakness. On 10th June, his COVID Report was tested positive and he was admitted to COVID Ward at GCS Hospital. We are highly impressed with the facilities and services provided by GCS Hospital. Cleanliness and Hygiene were highly taken care of. We even saw the cleaning was being done at late night too. Regular doctor visits, medications, expensive injections, reports such as CT Scan, etc. were done without charging us a single rupee. During night time too, Nurses and Doctors were treating the patients with the same dedication. Hospital has a special helpline for COVID patients which called us to inform about my father’s health condition and recovery regularly, which is a very unique and appreciable initiative. Home-like food, breakfast, soups, lemon water, etc, have been throughout the stay. My father was discharged on a ninth day after getting fully recovered. Our experience with Hospital staff, treatment by Doctors, hygiene, etc. was really good.

Mr. Ashish Gautam – My father Mr. Jagjivan Manilal Gautam was having difficulty breathing on 2nd July. We took him to GCS Hospital in an ambulance, where he was transferred to the COVID ward as his COVID test was diagnosed positive. He was kept under Oxygen support. On 12th July, my father was discharged after he was fully recovered. We were called regularly by Hospital regarding my father’s health condition. We were provided all the treatments and services free of cost. We are highly thankful to all the doctors, nurses, and staff.
