

Hazel M. McKain, RN, MSN, a Registered Nurse with Lenox Hill Hospital

Get to know Registered Nurse, Hazel M. McKain, who serves patients in New York City, New York.

New York City, Jul 7, 2020 ([IssueWire.com](https://www.issuewire.com)) - With over two decades of experience in her field, Hazel is a registered nurse who works at Lenox Hill Hospital in New York City, New York.

Lenox Hill Hospital is a 450-bed, acute care hospital located on Manhattan's Upper East Side. It is particularly well known for excellence in cardiovascular disease, neurology, neurosurgery, orthopedics, sports medicine, otolaryngology/head and neck surgery, maternal/child health, and internal medicine. The mission of Lenox Hill Hospital is to deliver outstanding health care with compassion and respect, to promote wellness in its communities, and to advance the field of medicine through education and research. The hospital seeks excellence in all endeavors, aspiring to provide premier services to a diverse patient population and to nurture an environment in which healthcare professionals and staff can learn and thrive.

Back in 2005, Hazel obtained her Associate in Applied Science in Nursing degree from Helene Fuld College of Nursing. She then went on to earn her Bachelor of Science in Nursing (BSN) degree and his Master of Science in Nursing (MSN) degree from Molloy College in 2012 and 2017, respectively.

A Registered Nurse (RN) is a nurse who has graduated from a nursing program and met the requirements outlined by a country, state, province or similar licensing body to obtain a nursing license. RNs fulfill a variety of job duties. In addition to their primary role in treating and caring for patients, their responsibilities also include educating patients and the public about a variety of medical conditions, as well as providing emotional support and advice to the families of their patients. Other RN job functions include leadership, research, performing diagnostic tests and analyzing results, operating medical equipment, administering medications, recording patients' symptoms and medical histories, and assisting with patient rehabilitation and follow-up.
