Hosted MNP Lookup Services

Garden City, Jul 21, 2020 ([Issuewire.com](https://www.issuewire.com)) - Hosted MNP Lookup Services by Carriox Cloud allows carriers and enterprises to check the status and live connectivity of numbers to help update their databases.

With mobile number portability becoming a common occurrence in most countries, it gets difficult for businesses that send frequent messages to keep their lists updated. Businesses may incur unwanted costs by routing the traffic to wrong operators and sending messages to mobile numbers that are no longer valid. Sending bulk messages without an updated database may result in a lot of unnecessary costs.

Our [hosted MNP lookup service](#) is suitable for businesses, small and large, looking at doing away with this cost. This service by BankaiCloud allows you to check the status of a number as well as its live connectivity. The database contains information regarding the current status of the number, whether it has been ported to another network or if it is currently roaming.
