

Industrial Metal Powder (I) Pvt. Ltd. come up with Iron Powder substitutes to Carbonyl Iron powder

Pune, Jul 26, 2020 ([IssueWire.com](http://www.IssueWire.com)) - Industrial Metal Powder (I) Pvt. Ltd. comes up with Iron Powder substitutes to Carbonyl Iron powder

Being one of the finest iron producers in the world, **Industrial Metal Powders (I) Pvt Ltd**, India, established in 1974, is one of the excellent substitutes for fine iron available in the world. It is always difficult to replace 100% by different manufacturing process but always possible to reach nearby specification and adjust the process.

Hence, Equiv. Carbonyl Iron Powder produced by IMP is one of the best economical options for the expensive fine powders. There are several benefits to Equiv. Carbonyl Iron Powder to end users like

1. Purity >99.5%
2. Excellent surface area
3. 100% production under GMP & HACCP practices
4. Economically available

5. Customized packing and quantity
6. Excellent reactivity
7. Due to irregular shape, it helps for better bonding.
8. Available in different particle sizes.

IMP is the only **ISO 9001, 14001, 22000 & 45001** certified company which support to make the products with zero pollution & keep the environment healthy and safe.

The global demand for iron is increasing especially for fine powders in different fields and it is very important to get a safe product with easily available and cost-effective with 100% quality assurance.

For these reasons, IMP could be the long term solution due to its expertise in fine powders, world-class quality control system, capacity, ethical business policies which enable IMP to give quality at every batch since 1974.
