

Model Citizen—Masks, Gloves, and Sanitizer, Right to Your Door

Los Angeles, Jul 5, 2020 ([IssueWire.com](https://www.IssueWire.com)) - As our society struggles to re-open during the global COVID-19 pandemic, it's important that we all do our part to stay safe and flatten the curve. Still, it can be difficult to prioritize finding masks, gloves, and sanitizer during national shortages—especially when there's so much else in our day-to-day lives keeping us busy. Enter [**Model Citizen**](#)—bringing personal protective equipment right to your doorstep.

[**Model Citizen**](#) is an **affordable and convenient** subscription box service that delivers high-quality masks, gloves, and hand sanitizer directly to your door each month. The box contains enough PPE (an acronym for personal protective equipment) to last one person a whole month! In each shipment you'll find twenty 3-ply masks—these are made with three layers of high-grade materials to prevent the transmission of viruses and other airborne pathogens—15 pairs of vinyl gloves, and one 8oz. bottle of hand sanitizer filled right here in the USA.

The Model Citizen Story:

As a filmmaker by trade, our founder and CEO, Sam Gostnell, was struck by how diligently the staff at several local nursing homes worked to keep their beloved residents happy and safe while he was on-site producing a commercial for a long-term care provider. At each and every home, he was reminded that all of our community members—especially those who are most vulnerable—deserve our care and protection.

After the pandemic began to take hold of our country, Sam, staying in touch with the management team, realized that if it was this difficult for healthcare providers to receive the desperately needed masks, gloves, and other PPE through their existing supply chains during the COVID-19 emergency, it must be nigh on impossible for the average citizen to find consumer-grade protection.

“The experience made me realize getting masks into the hands of as many people as possible was imperative, and that's how [**Model Citizen**](#) was born,” Sam tells us.

“As society reopens, we've got you covered. We want to help protect you, your loved ones, and your community. We are in this together, and we hope you let us care for you.”
