

NavMed Supply, a Bulk PPE Supplier Online in the USA, Launched New Website

NavMed Supply, a Bulk PPE Supplier Online in the USA, launches its official website. NavMed is able to supply large quantities of PPE items such as N95 respirator, Face Shields, Surgical Gowns, and many more.

San Francisco, Jul 29, 2020 ([IssueWire.com](https://www.issuewire.com)) - [NavMed](https://www.navmedsupply.com) Medical Supply Company, a leading medical items, and PPE supplier in the USA announced its official website. The new website accommodates its customers for more convenience in ordering PPE, such as [bulk n95 face masks](#) and other medical items. PPE items such as face mask, surgical gown, and respirator are currently an increasing demand due to the COVID-19 pandemic that hasn't been over yet.

NavMed specializes in providing [bulk PPE supplies](#) to supply hospitals and other health facilities. Personal Protective Equipment (PPE) is a must to wear equipment for doctors and health practitioners to protect themselves from the exposure of unwanted hazards. The company has been working together with extensive supply networks to provide high-quality medical supplies to government and private industry buyers. It offers a wide range of medical products such as 3-ply Surgical Masks, Face Shields, N95 respirator, KN95 respirator, Surgical Gowns, and Tyvek suits.

Jimmy Smith, the company representative, said, "Our company is capable of delivering bulk N95 face masks orders. We also guarantee our products are of high quality and have undergone a test to meet the standard for medical use." He also explained that NavMed Supply is prioritizing their clients' satisfaction and needs. "We always update our PPE stock, and we have vast networks that support our business". N95 face masks are known for their ability, such as 99.9% (BFE) Bacterial Filtration Efficiency, 99.5% (PFE) Particle Filtration Efficiency, and 99.9% (VFE) Viral Filtration Efficiency. Thus, it provides adequate protection against many substances, including diseases from viruses such as COVID-19, SARS, and H1N1 Avian Flu.
