

NEET coaching classes in Hyderabad| IIT- JEE coaching institutes in Hyderabad

Best neet coaching centers in Hyderabad, AIIMS coaching centres in Hyderabad, JEE coaching centres in Hyderabad

Hyderabad, Jul 17, 2020 (Issuewire.com) - Phychem is a premier coaching institute for Biology, Mathematics, Physics and Chemistry. It is founded by teachers who have more than 25 years of experience. They helped many students in clearing NEET and IIT-JEE entrance examinations with top ranks. At Phychem, the focus is on building a strong foundation of concepts.

NEET & IIT-JEE are concept based. Many colleges and coaching institutes flood the student with unnecessary information. The same cannot be mastered in the available short time. That creates confusion in the minds of the students and dents their confidence. At PhyChem, experienced teachers sift the subject, remove unnecessary information and teach what is really important. They provide a strong conceptual base. As a result, from an ocean of confusion emerges clarity and confidence.

- At the beginning of the course, fundamentals of Mathematics are taught which helps in solving the Physics problems easily.
- Every concept is taught thoroughly in a simple and systematic manner.
- Special focus is placed on solving different problems in Physics which involve multiple concepts, logical thinking and imagination.
- Chemistry comprises of Organic Chemistry, Physical Chemistry and Inorganic Chemistry. Different techniques are necessary to master these three subjects. Therefore, subject specific teaching methods are used while teaching Organic Chemistry, Physical Chemistry and Inorganic Chemistry.
- Practice tests are conducted and the results are analysed. This will help in concept building, time management and ironing out weaknesses.
- A strong root level understanding and learning of Biology, both Zoology and Botany, is provided to help students score well in NEET as this subject comprises 50% marks in the competitive exam.
- The NEET Biology program is structured with conceptual clarity and rigorous practice of questions. Focus is made to help the students remember all the topics well and gain confidence in the subject through graphical representations, notes and developing correlations within different topics to solve an MCQ.
- Students are specifically trained to develop a knack of understanding and solving tricky Biology MCQs.
