

NJHRC's Free Video Consultation Service to Solve Your Hair Loss Problems

Using a smartphone or home computer, patients can use a variety of video calling applications to get free video consultation at New Jersey Hair Restoration Center.

Freehold Township, Jul 3, 2020 ([Issuewire.com](https://www.issuewire.com)) - During the COVID-19 crisis, New Jersey Hair Restoration Center is taking all the necessary steps to ensure that their patients get the best hair restoration solutions right in the comfort of their homes.

“This pandemic has brought about many changes, and we at New Jersey Hair Restoration Center want to serve our patients and clientele with utmost care. We will continue to provide the best solutions for hair loss without compromising on quality,” said Dr. Emil Shakov, Co-founder of New Jersey Hair Restoration Center.

Dr. Emil Shakov specializes in providing his patients with hair loss treatment and hair restoration with the most advanced surgical techniques. During the free video consultation, patients can rest assured they will receive the most effective treatment without the hassle of providing vitals and X-rays. Dr. Shakov can effectively view and assess the type of hair loss and determine the best solution via video consultation.

Using a smartphone or home computer, patients can use a variety of video calling applications to get free video consultation at New Jersey Hair Restoration Center. During the free video consultation, patients should feel free to ask any questions or raise concerns about the procedure at any given point of time.

In this ongoing global pandemic, the use of video consultation technology has allowed New Jersey Hair Restoration Center to provide the [best hair restoration solution](#) to the patients. The virtual consultation can be done in full privacy from the comfort of your home or office, which saves time you'd use

commuting.

New Jersey Hair Restoration Center is known to offer the best hair restoration solution in the entirety of New Jersey through a highly advanced, minimally invasive technique. No other hair restoration procedure offers this natural look.
