## P. Douglas DeHoll, MD, an Orthopedic Surgeon with Palmetto Health-USC Orthopedic Center

Get to know Orthopedic Surgeon Dr. P. Douglas DeHoll, who serves patients in South Carolina.

specialties and clinical interests include minimally invasive spine surgery, cervical spine surgery, lumbar spine surgery, adult scoliosis surgery, revision cervical surgery, revision lumbar surgery, as well as the evaluation and treatment of sciatica. He is in practice with Palmetto Health-USC Orthopedic Center with offices in Columbia and Lexington, South Carolina.

The 2016 creation of the Palmetto Health-USC Orthopedic Center established a hub of orthopedic expertise that is unmatched in the region, combining five practices from the Midlands and Sumter. These include Moore Center for Orthopedics, USC Orthopaedics, Premier Orthopedic Specialists, Orthopedic and Spine Surgeons of South Carolina, and Sumter Orthopaedic Associates.

Back in 1997, Dr. DeHoll earned his medical degree from the Medical University of South Carolina College of Medicine. He completed his internship and residency in orthopedic surgery at the University of Texas Health Science Center at San Antonio, and completed a combined neurosurgical and spinal surgery fellowship at the Norton Leatherman Spine Center at the University of Louisville School of Medicine in Kentucky.

Continuously excelling in his field, the doctor is board-certified in orthopedic surgery by the American Board of Orthopedic Surgery (ABOS). The ABOS is an organization with the goal of establishing educational and professional standards for orthopedic residents and surgeons, as well as evaluating the qualifications and competence of orthopedic surgeons.

In addition to being a Fellow of the American Academy of Orthopedic Surgeons, he is a member of the North American Spine Society, the American Medical Association, the South Carolina Orthopedic Society, and the Sumter Clarendon Lee Medical Society. He also serves as President of the South Carolina Spine Society and is involved in the development of new surgical implants.

Orthopedic surgery is the branch of surgery concerned with conditions involving the musculoskeletal system. Orthopedic surgeons use both surgical and non-surgical means to treat musculoskeletal trauma, spine diseases, sports injuries, degenerative diseases, infections, tumors, and congenital disorders.
