

## Perception System to be an official Amazon Web Service Provider

**San Jose, Jul 31, 2020** ([Issuewire.com](http://Issuewire.com)) - Perception System, a prominent website and app development company declares itself to be an official [aws consulting partner](#). This partnership was successfully created on 28th June 2020.

As a part of the official APN, Perception System can now create proficient AWS-based solutions and offer much more flexibility and scalability to businesses in terms of technical support. Their APN program will provide many significant opportunities that they can build on to create new business horizons.

“Our main focus is towards helping our clients, not only by migrating web applications to Amazon Web Services but also to focus on creating their managed services to the most of AWS when it comes to cost, innovation and other benefits,” said [Shahin Mansuri](#), CEO of Perception System.

He further added, “our goal is to help organizations across the world promote cloud technologies and to innovate their businesses with security and agility offered by AWS. Our mutual initiative with Amazon will help our clients to meet their business perspective and to transform their online business more effectively.”

Perception System CEO, Shahin Mansuri believes that the demand for AWS support and services is the

output of AWS popularity and its future growth trends. Perception System is the early adopter of cloud technologies by implementing and integrating it in its clients' projects. "Our skilled AWS developers have been working closely with customer R&D products team to address the architectural and performance challenges faced in building flawless cloud-based web applications," the CEO added.
