

.STUDIO by Love That Design – A game changer for the A+D industry!

London, Jul 14, 2020 ([Issuewire.com](https://www.issuewire.com)) - **.STUDIO** by [Love That Design](#) has been built specifically for the Design & Construction industry to manage and track project resources. In short, it makes the life of Interior Designers & stakeholders much MUCH easier.

.STUDIO is a software that promises much higher efficiency. It promises to take the headache away

from dull processes and smoothen your workflow, leaving you to focus on the part of the design that you love. And it does all this while improving the bottom line.

Designers are offered a host of tools that take away much of the laborious and 'headache-inducing' part of current design work (particularly manually feeding excel sheets). For example, with just a click of a button, designers can now easily create, change, and manage specification documents, with the changes reflected across the board and in all relevant segments of the project.

.STUDIO was also built specifically for the Design & Construction industry to manage and track project resources. The software allows you to collaborate with your team, clients, and stakeholders, and manage multiple process threads without any hitches.

Here is what some of the most creditable design houses have to say after testing .STUDIO for the better part of the year:

"As an international Practice, .STUDIO is enabling me to holistically manage all aspects of my business from anywhere in the world." - Kristina Zanic, Kristina Zanic Design Consultants

".STUDIO allows us to be more efficient and productive, giving designers more time to focus on what they are good at - design" - Kathryn Athreya, Roar

About Love That Design - www.lovetthatdesign.com:

Using the combined awesomeness of our industry knowledge and digital capabilities, we have created a platform that showcases the best of what the region's Architect+Design community has to offer.

In our relentless pursuit for achieving the highest standards in design, and with our vast network of industry professionals, we aim to drive the design industry further by creating and curating quality content, celebrating achievements of the region, enabling dialogue, and so much more.

About .STUDIO - get.lovetthatdesign.studio:

.STUDIO is a workflow automation software that manages and tracks project resources from Pitch to Completion.
