

Why Water Purification Systems Like Kangen Are Essential

Thanh Pho Ho Chi Minh, Jul 7, 2020 (Issuewire.com) - Many people are choosing to install a Kangen water purification system in their homes for clean water that tastes great every time. Without a doubt, drinking a lot of water is good for your health. It's important to stay hydrated and many people do not drink nearly enough water each day. However, not all public water systems are created equal and it's impossible to know how healthy, or dangerous, your tap water is.

Bottled water isn't much safer as many tests show that the expensive bottled water is no different from

area tap water. So what can you do to make sure you have crystal clear healthy drinking water that always tastes great? Read more to find out why water purification systems are important and which are the best to invest in.

Do You Need A Water Purification System At Home?

While Vietnam has made many efforts and celebrated many improvements in connecting the public with drinking water, recent testing has still shown a significant amount of contamination in the tap water. The taste also varies widely which is why many people choose to drink bottled water which can be expensive and wasteful, having a negative impact on the environment and your health.

Installing a home purification system, such as the Kangen water purifier, for your water will ensure that you have fresh, pure water that tastes great at all times. Purified water also carries a lower pH level that has many health benefits. Not only does a water filtration system improve the water you drink, but it also has benefits for cleaning and washing. Filtering your water removes bacteria, heavy metals, and chemicals. While the filtration products aren't always cheap they are long-lasting giving your upfront investment great value. You won't need to buy an endless amount of bottled water anymore and that will save money in the long run.

The Benefits Of Drinking Alkaline Water

Alkaline water has been a hot health trend on a global scale in the last few years. So what is alkaline water and why is it good for you? Water that is ionized through electrolysis with a higher pH level is considered alkaline. Some water ionizers like the Kangen brand actually allow you to switch between various levels of pH to achieve different results.

One of the most notable benefits to alkaline water that has been proven in scientific studies is that it helps to soothe acid reflux. Studies by the Annals of Otolaryngology, Rhinology & Laryngology, and the Journal of the International Society of Sports Nutrition have confirmed this. There are many other benefits of drinking and using alkaline water.

- Alkaline water is more hydrating than basic tap water and is beneficial to people that are very athletic or who work outside doing laborious jobs.
- Alkaline water can help boost immunity and reverse the acidic effects of a poor diet.
- Alkaline water has an increased amount of healthy minerals such as magnesium and calcium. Because of this, alkaline water can be good for healthy bones.
- Alkaline water contains antioxidants that prevent the growth of free radicals in the body that rush the aging process.
- Alkaline water helps neutralize the acidity in your body and improves your digestion.

Alkaline water is somewhat controversial in the respect that not many scientific studies have been done to support the health benefit claims. People with first-hand experience drinking alkaline water and review water purification systems such as Kangen have had great success. They report that their water smells and tastes great and also reported improved health as a result of making the switch.

Top Five Products For Home Water Purification

#1. Best Overall Water Purification System - Kangen

Perfect for safe and healthy drinking water that tastes amazing, the [Kangen systems](#) are all top-notch and receive high reviews all around. Kangen systems provide electrolytically-reduced, hydrogen-rich water that helps restore your body to a more alkaline state. The Kangen products go well beyond simply filtering your water. Improves drinking water, food prep, and cleaning capacities. If you want to learn more about Kangen, skip the bottom of this article for a full product review.

#2. Best For Removing Contaminates - APEC Water System ROES-50

This 5-stage water purifier can remove up to 99% of common water contaminants like arsenic, chromium, cadmium, fluoride, and others. It is very efficient and comes with a water storage tank that holds up to 4 gallons at a time.

#3. Best For Camping & Survival Kits - LifeStraw

The LifeStraw system is for emergencies or other situations where you fear you might not have access to clean water. It removes bacteria and viruses from natural water sources which can be highly contaminated. It can process 9-12 liters per hour and is great for camping, backpacking, hiking, or emergency prep kits.

#4. Best For Your Kitchen Counter Top - Brita Metro Pitcher

If you don't have the money to install a permanent filtration system, you can at least filter water one pitcher at a time using Brita. This will help your water be cleaner and taste better, although it lacks features like ionization and creating alkaline water. You will have to keep buying filters and remember to refill the pitcher as you use the water.

#5. Best Faucet Attachment - PUR FM 3700

If you want to purify the water coming from a specific source in your house, usually the kitchen sink, you can install this faucet purifier that quickly filters water as it flows from your tap. It's easy to install and creates clean water in a snap but one major drawback is that running hot water through it can damage the filter.

Choosing Kangen Water Purification Systems For Your Home

The Kangen water technology is so popular that people refer to the fresh clean results as "Kangen Water." The water filtration device produces ionized alkaline and acidic water through electrolysis. You can adjust the pH balance in your water with the touch of a button.

The Kangen products can produce five different water types, each with their own specific use. Here is a quick explanation of each water type.

- Strong Kangen Water

With a pH level of 11, the "strong Kangen water" is not for drinking. This water type is used for cleaning and food preparation. It can also be used for stain removal and dishwashing.

- Kangen Water

With a pH of 8.5 - 9.5, “Kangen Water” is perfect for drinking and cooking. This hydrogen-rich water can restore the body to a more alkaline state. You can use this water type for drinking, food prep, making drinks, and watering plants.

- Clean Water

The “clean water” setting provides purified water without the extra pH boost. This is neutral fresh drinking water which is great for taking medication or for preparing baby food.

- Beauty Water

Lower pH water, in the 4-6 range, has astringent effects that are great for gentle cleaning and beauty care. You can use this water type to wash your face or for washing pets. It’s also great for washing your hair.

- Strong Acidic Water

You might wonder why anyone would want access to “strong acidic water.” With a pH of 2.7, this water type is not for drinking. It does have strong cleansing properties which make it great for washing utensils and cleaning countertops. It can reduce germs in your home or in a commercial setting.

Most of the Kangen products sit on your countertop next to your sink. There is also an under the counter model available if you need to save counter space. They are easy to install and operate. Here are a few of the models available and some customer reviews.

Kangen K8 - The Mighty 8-Plate Anti-Oxidizer

This is Kangen’s most powerful antioxidant machine. It has 8 platinum-dipped titanium plates that improve water ionization and boost antioxidant production. Here is what customers are saying:

“You get what you pay for, it’s worth every penny.” - Amazon Review

“My joint pain and over health has improved. Change your water, change your life.” - Amazon Review

Kangen SD500 (Also Available In Platinum)

The ultimate home use model. This is the original Kangen product that has 5 water types at the touch of a button. Known to be the highest quality ionized water purification system available. Here is what customers are saying:

“My life completely changed for the better. I can sleep, no eczema, no migraines!” - Amazon Review

Kangen SD501U - The Under Counter System

Do you have limited counter space in your kitchen? That’s no problem with the Kangen under-counter model. You get the same benefits as the standard SD501 but it’s tucked away under the sink. Here is what customers are saying:

“It’s the gold standard, I am impressed.” Amazon Review

One final fact you need to know about Kangen is that it is sold exclusively through carefully selected distributors. It is easy to get confused and buy from a third party and receive a knockoff instead of our highly coveted brand. Make sure to purchase from this link for a [verified purchase](#) for Vietnam customers.
