

Adsignify Turns Android Devices Into A Fully Functional Active Directory Management Tool

Los Angeles, Aug 28, 2020 ([Issuewire.com](https://www.issuewire.com)) - Every IT administrator faces many challenges in Active Directory management, especially with managing Active Directory user accounts, almost every day. ADSignify is a beautiful and intuitive mobile management tool designed for Windows Administrators and Managers to manage Microsoft Active Directory directly from your Android Phone and Tablet.

ADSignify is a comprehensive mobile-based Microsoft Windows Active Directory management software. It simplifies user provisioning and AD administration with complete security and authentication to allow only authorized users to perform management actions. This AD management tool allows administrators and AD managers to manage AD users, computers, contacts, groups, and more, efficiently. It also makes it possible to provision users in Exchange, Office 365, G Suite and also generates reports for all the domains, or in AD environment from a central location.

The app is ready to use immediately after download. Absolutely no software or any bits are required on Active Directory Server. An app that can simplify and automate these cumbersome tasks and provide exhaustive reports on AD objects is the need of the hour. ADSignify is one such simple, hassle-free mobile-based Active Directory management tool, with secure authentication, which allows you to perform all actions with just mouse clicks.

This AD management tool offers administrators customizable templates to manage all the aspects of Active Directory account creation and modification. Moreover, through its mobile-interface, this AD management app offers administrators an absolute control over their Active Directory environment.

Turn your Android device into a fully functional Active Directory management tool and enjoy the freedom to manage your AD environment from your office, home, or anywhere. Being an enterprise app, we value your security and privacy and made it absolutely free of any advertisements or banners. ADSignify is free to download and use. Premium features are also available as an In-App purchase.

Configuring user properties manually is extremely time-consuming, tiresome, and error-prone, especially in a large, complex Windows network. Active Directory administrators and IT managers mostly have to perform repetitive and mundane tasks like password reset, which often ends up eroding into their productive time. Moreover, accomplishing these tasks using the native tools or PowerShell also demands a deeper knowledge of the complex AD management process and related technologies.

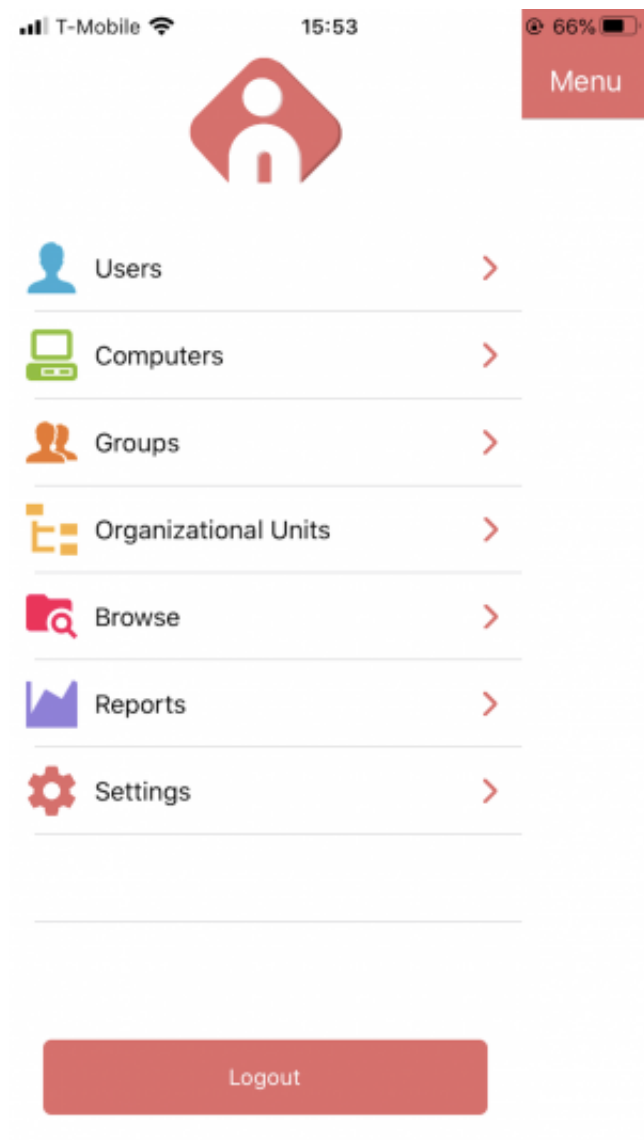

ADSignify enables administrators to delegate repetitive, simple, time-consuming tasks to non-administrative users or help desk in a completely secure manner. It also allows for complete and controlled AD automation. This Active Directory manager automates error-prone AD administrative activities.

About the Company

Signifium LLC is founded by a team of Windows Administrators. We plan to make mobile apps for Windows Administrators to help them manage their work from anywhere and everywhere. They are fond of beautiful things and smooth user-experience and that is what they aim for in their apps.

Design and look and feel at its best.
