

Bardia Zadeh: A Unique Story of Success of a Young and Talented Entrepreneur.

The kid with the Midas Touch, Bardia Zadeh has had the most unique journey of success from an actor to an entrepreneur.

Atlanta, Aug 21, 2020 ([Issuewire.com](https://www.issuewire.com)) - Iranian national Bardia EsmaeilZadeh is a man of many talents and skills, with a strong connection to his culture. Since 2009 he has been living in the United States where he continues his upwards trajectory on the path to success. He is the true story of the American Dream and many young entrepreneurs cite Bardia as their role models and inspiration.

Bardia EsmaeilZadeh, known as Bardia Zadeh, has had the most unique journey of success from an actor to an entrepreneur. Bardia has a background in computer science and is currently studying in Kennesaw State University, this 23-yr-old has managed to tread the 'path less chosen' successfully, courtesy of his determination, focus and dynamic creativity!

In an interesting start to his varied career-paths, Bardia was spotted by a talent scout at a young age whilst he was auditioning for a small theatrical production; this talent scout knew that Bardia had all the star qualities to make it as a Hollywood actor, so signed him up to his agency. "I always knew I'd be an actor – it was clear right from my childhood," Bardia says, "I would step out onto the stage – it didn't even have to be a stage – and people would have no choice but to stop and listen. They were mesmerized by me. I knew that this was something I wanted to pursue." It was from then that Bardia became aware of his talents and how to utilize them to his advantage. Bardia became a well-known actor and has appeared in many English and Iranian films, working with some of the best actors of his generation, and is still to this day recognized in the street by fans of his work.

[Bardia Zadeh](#) shifted careers from being an actor to an entrepreneur in 2014 when he started his own company called [Micrer](#). The company focused on manufacturing high quality 3D printers. Explaining how it all began, Bardia says, "I completely redesigned and created a new kind of 3D printer that was able to print in large sizes while keeping the high precision. I have sold many units all around Atlanta GA and to universities." Certified in SolidWorks, Bardia also offers CAD services including 3D scanning, designing and printing, CNC machining, laser cutting and engraving.

Adding another string to his bow, Bardia started a marketing company named Bravo Marketing in 2017. The company focused on marketing and creating intelligent strategies for clients, so as to provide world-class services in connecting them to the global market. [Bravo Marketing](#) has helped many big-name Iranian artists with their careers, such as Erfan Paydar, Donya Dadrasan, and Baran Music.

His time in marketing has led Bardia to become extremely proficient in Photoshop, Illustrator, After Effects, and Final Cut Pro, learning these new software as and when his projects required. Bardai has worked with many clients over the years, drawing upon his networking skills as an actor with his adeptness with technology.

More recently, Bardia has shifted part of his focus and investment into real estate construction and remodeling in Metro Atlanta areas, choosing to found another successful company that focuses on house remodeling and flipping. Thanks to his knowledge and insight into the construction industry, far more so than his competitors, Bardia has transformed his business into a multi-million dollar enterprise, seeking to expand into further territories.

When asked what makes him seek knowledge in such various disciplines while also achieving many milestones at such a young age, [Bardia](#) explained, "I have always loved the idea of learning, absorbing knowledge and understanding to put them in practical skills. It has been a bit of luck, but a whole lot of determination and dedication to each facet of my life while also a lot of smart choices that have led me to become what I am today!"

In Bardia's spare time, he enjoys designing in both 2D with Photoshop and 3D with CAD. He is an avid collector of vehicles, with a modest collection of vintage cars and motorbikes, and a private pilot's license to go hand-in-hand with his private planes.

What does the future look like for Bardia? Well, he certainly shows no sign of slowing down, saying "I am constantly looking for the next innovation that will help me to change the world. Many people with my

wealth and talents would think about retiring at a young age, but that's not the life for me. I still have so much more to give to the world and it would be a shame if I were to deny the world my talents, just because I was obsessed with 'retiring'. Bardia Zadeh is definitely one to keep an eye out for – who knows where this young, impressive entrepreneur will end up?
