

CanXida LP Formulator, Eric Bakker ND, Set to Start Covering New Topics and Niches in his Youtube Channel

Los Angeles, Aug 31, 2020 ([IssueWire.com](https://www.issuewire.com)) - Eric Bakker is pleased to announce to the general public that his YouTube channel "Eric Bakker - The Naturopath" which has for several years focused on providing quality information on Candida, will start covering other topics from now henceforth.

The topics to be covered going forward will include omega 3, adrenal fatigue, brain fog, leaky gut, immune health stress, gut related problems as well as the original candida the channel had been all about.

Committed to improving people's lives through quality information that helps them make good decisions as it concerns candida, the naturopathic expert who runs this YouTube vlog is poised to expand the horizon of what he does. This promises to be a big move in the right direction as the number of internet users in the world continue to increase by the day. An obvious observation of this would be the spike in social media use in the heat of the COVID-19 lockdown in most parts of the world in the last couple months. If people are online consuming health information, it is therefore pertinent that they get the right one.

In the words of Eric Bakker, the founder of Eric Bakker - The Naturopath, "Some of my viewers find it shocking that I upload so many videos on my YouTube channel and wonder why. The reason is that I like to see people recover. Of course, part of the reason is my desire to leave a legacy behind for the future generations"

Eric Bakker's [YouTube channel](#) has been around for 7 years now. In that time, he has been sharing mostly exclusive content on Candida; how to manage, treat and prevent it through natural processes. On expanding the scope of health problems his channel will be tackling, he has the following words for his audience "This channel was originally about Candida but has undergone an evolution over the years to cover SIBO, parasites, leaky gut, IBS and just about every health problem of the guts. I will continue to expand and improve my reach so as to be able to cover even more health issues"

About Eric Bakker - The Naturopath

Eric Bakker ND is a naturopathic practice in the name of the owner and founder, Eric Bakker. The New Zealand physician has been in the industry for over three decades and has gone on to spread his influence in as many spheres of his industry as possible for the better good of humanity. Most notable is his contribution to the management of Candida through natural means as can be seen on his YouTube channel and blog named [Yeast Infection](#). Having invested several years into understanding and managing Candida, it was only natural for Eric Bakker to come up with a formulation for tackling Candida. He called it CanXida, and it was designed to remove yeast infections, restore normal yeast balance in the body, and help rebuild immune defences against reinfection.
