Chiropractic is a form of alternative medicine that mainly deals with the diagnosis and treatment of mechanical disorders of the musculoskeletal system, especially the spine. A chiropractor uses spinal adjustments, manipulation, and other techniques to manage patients' health concerns, including neck pain and back pain. They aim to improve patients' functionality and quality of life by properly aligning the body's musculoskeletal structure and enabling the body to heal itself without the use of medication or surgery.

Outside of the office, Dr. Herrera enjoys spending time with his family, playing golf, and snowboarding. He is fluent in Spanish, allowing him to work closely with the Spanish-speaking community.
