

Dermagate Inc. is ready to serve the global community with its reusable self-sterilizing silver ions face masks

Reusable face mask with antimicrobial properties

Quebec, Aug 10, 2020 ([Issuewire.com](https://www.issuewire.com)) - To protect from the harmful viruses amidst the COVID-19 pandemic, a premium quality face mask is necessary, and when it comes to face masks, what can be of a better option than the silver ions face masks of **Dermagate**. Available at affordable rates, these face masks have already gained popularity across the globe due to its beneficial characteristics. These masks are made of nylon and coated with 99.9% silver (Ag) and have caught the attention of many for its lightness and capacity to protect the person from germs. With the huge demand coming from various regions, the company has announced the launch of a crowdfunding campaign on the Indiegogo platform in order to expand the manufacture of the silver ions face mask – ‘Peace of Mind’. With this campaign at www.facemaskideal.com, people will now be able to benefit from the features of the mask at competitive rates while helping the company to continue with its work of serving the world.

The first face mask model of **Dermagate** was launched in April when the COVID-19 cases were on the rise and since then, there has been no looking back. Consumers have loved the quality and features of the mask, which has encouraged the company to multiply its production. The textile used in the manufacture of the masks has been washed over 100 times, showing no reduction in electrical conductivity, germ restriction abilities, and effectiveness. These facts make it pretty clear that people can completely rely on the protective features of the masks. The silver ions face mask has replaced all non-medical face masks, a huge credit for which can be given to the durability and hassle-free maintenance. Keeping the global economic crunch in mind, the company has manufactured these masks in such a way that the consumers won’t have to throw it away after a few uses and then look to purchase a new one, as these can be reused by the consumers for almost twelve months without even bothering about the quality getting dropped. These face masks will literally give you ‘Peace of Mind’ amidst this worldwide crisis.

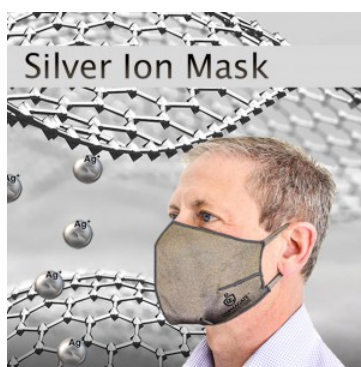

One of the most important features that people look for in a mask is how light and comfortable it is. People have to wear face masks as long as they are outside their residence, and due to this, lightness and comfort are big factors that need to be kept in mind while producing masks. **Dermagate** has made sure that the consumers do not get to complain about a single component of the mask – the masks are light and comfortable enough to be worn for the entire day without any hassle and strong enough to protect the face from germs. The silver ions face mask fits perfectly and feel just like a body part. The masks are suitable for daily wear – you can go to work, shopping malls, or use public transport without any worries. It doesn't possess any threats to the skin tissue of the person wearing it. The strength and protective features of the mask make it perfect for all working personnel and even health care professionals.

Gaetan Houle the President of **Dermagate** states, 'We are ready to grow with the demand and everything has been meticulously planned. My team is prepared to serve our new clients worldwide. I am really proud of them and the high quality of the products they create and manufacture for the community.' The team believes and has substantial results to back it up that these masks significantly reduces the impact of the surroundings and work much better compared to any disposable or homemade masks. Also, the people suffering from acne problems can benefit from these masks as these have been manufactured following the Canadian technology of treating acne and other skin disorders. Not only the 'Peace of Mind' masks but the company also offers other safety wear products, like baby gloves, vests, and many more.

Now, with the crowdfunding campaign on the Indiegogo platform, everything just seems to get a whole lot better with the products of **Dermagate**.
