Chiropractic is a form of alternative medicine that mainly deals with the diagnosis and treatment of mechanical disorders of the musculoskeletal system, especially the spine. A chiropractor uses spinal adjustments, manipulation, and other techniques to manage patients’ health concerns, including neck pain and back pain. They aim to improve patients’ functionality and quality of life by properly aligning the body’s musculoskeletal structure and enabling the body to heal itself without the use of medication or surgery.

When she is not in the clinic, Dr. Domingo uses her chiropractic education to teach future healthcare professionals about anatomy and physiology at the college level. She also enjoys cooking, baking, and singing. An avid reader, her favorite book genres include crime, mystery, and history. She is also an avid sports fan and has studied abroad twice in France, which furthered her love of professional soccer.
