What Sets Us Apart?

Advanced Technology: We use solvent-free ink that is not only good for the environment, but it penetrates the substrate more evenly than solvent-based ink, so fewer passes of the printer heads are needed to achieve full saturation. Our printers are also equipped with a convection heating system that enables our graphics to be handled and even laminated, immediately upon creation while our competitors need to let theirs dry for up to 24 hours.

Our Color Management System is the best in the Process Printing industry. We use the same portable device (colorimeter) that we use to calibrate our design computer monitors and printers to match your desired color.

We print on wraps & coverings that require Active Pressure before they adhere which significantly reduces the time to install. We use Floor Covering laminates specially made to prevent skidding so floors are safer for customers to walk on after the floor graphic is laid down.

As a full-service sign company, we expertly produce all types of indoor signs, [outdoor signs](#), top of the line [vehicle wraps and graphics](#), event signage, vinyl banners, and more to help businesses achieve their marketing goals. We offer a wide range of colors, finishes, and mounting options to ensure our clients get what they want. We are ready to work with you to provide solutions that are within budget, on time, and are of superior quality.

We are ready to elevate your Chicago business with innovative signage solutions. For more information please visit: surelysigns.com
