

3 Storeys Launches MAVICK PRO for Real Estate Photography

The drone things via MAVICK PRO, particularly aerial stills, are a fast and trouble-free way to stand 3 Storeys out!

Sydney, Sep 14, 2020 (IssueWire.com) - 3 Storeys feels elated and excited to launch the MAVICK PRO, a powerful and portable drone that sports a sophisticated design and innovative technology for taking the best aerial real estate photography. MAVICK PRO is a world-class and high-tech aircraft system that is typically used to capture the views of a property's land area, home lineaments, etc. The photos and videos of real estate property are typically collected for real estate dealers so that they can display grandeur homes to potential investors.

Why use real estate drone photography?

Aerial real estate photography acts as a catalyst to prompt potential real estate property owners to own a home and is therefore valuable for them. At 3 Storeys, we believe that properties with aerial imagery maximize the odds of the sale of a real estate property virtually 70% relatively more likely than properties without aerial imagery. In fact, the percentage is progressively growing, as time passes.

3 Storeys' property dealers use aerial real estate property photography Northern Beaches by using MAVICK PRO to display potential buyers an array of details, such as:

- Comprehensive aerial views of the real estate property and land area end-to-end.
- The specs of the roof and other property aspects that are hard to be evaluated.
- To guesstimate the drive home or the kids' walk to school appears like.
- The environs and the adjoining area, covering the home's nearness to facilities.
- Property maps and surveys

Another main thing to factor in is that Professional Property Photography Northern Beaches,

not only helps in selling residential properties easily but also sells you as a real estate dealer. ABC, the owner of 3 Storeys, has been an avid and experienced aerial real estate property photographer. His team members have been actively involved in creating aerial footage of houses and other residential properties. "The drone things via MAVICK PRO, particularly aerial stills, are a fast and trouble-free way to stand yourself out," says one of the team members of 3 Storeys.
