

Anthony Economou, OD, DO, FAOCO, an Ophthalmologist with Tulsa Glaucoma Specialists

Get to know Ophthalmologist Dr. Anthony Economou, who serves patients in Tulsa, Oklahoma.

New York City, Sep 10, 2020 ([Issuewire.com](https://www.Issuewire.com)) - Dr. Economou is an adept ophthalmologist and glaucoma specialist serving Tulsa and the surrounding communities at his private practice, Tulsa Glaucoma Specialists. With over 25 years of experience and a patient base exceeding 20,000 successful patients, his mission is to provide the highest level of care while halting disease progression

and preserving vision.

Active in the eye care community, both local and abroad, Dr. Economou provides individuals with the highest level of care, diagnostic testing, lasers, and surgery if needed. He is able to assist them with primary care treatments, diabetic sugar testing, hypertension monitoring and diagnosis, cardiac medication cross-reference screening, as well as screenings for psychological care, management, and depression.

“It is my philosophy that all patients should be diagnosed and aggressively treated with only FDA-approved techniques while minimizing ocular surgery on the eye. This can be successfully achieved using OMNI. When surgery is needed, I use an outpatient surgery center to shorten the patients cost and downtime. I only utilize current, FDA-approved medications first, then move appropriately to in-office minor surgery, and Ahmed valve and full surgery on the eye as a last resort” expressed Dr. Economou.

A Fellow of the American Osteopathic College of Ophthalmology (FAOCO) and a member of the American Osteopathic Association, he is board-certified in ophthalmology by the American Board of Ophthalmology (ABO). The ABO is an independent, non-profit organization responsible for certifying ophthalmologists in the United States of America.

A native of Tulsa, Dr. Economou attended Tulsa University, completing his degree in Science. He then went on to earn his Optometry Degree (OD) from Northeastern State University College of Optometry. In practice only a year, he returned to medical school, graduating with his medical degree from Oklahoma State University College of Osteopathic Medicine. Upon graduation, he went on to complete his residency in Killeen, Texas, followed by his fellowship in ophthalmology and glaucoma Fellowship at Albany Medical Center in New York.

“I have participated in several FDA trials and research while continuing to extend my skill and knowledge speaking around the world. I stay active in the science and treatment of glaucoma and utilize the most groundbreaking approach when treating. There is no cookie-cutter approach. Glaucoma is a serious and debilitating disease. I have dedicated my life to preserving vision while treating glaucoma successfully and aggressively” as stated by Dr. Economou.

To date, the doctor frequently attends seminars and meetings. Likewise, he continues to advance his education and expertise with the latest technology, knowledge, and state-of-the-art diagnostic testing and treatment plans.

Ophthalmology is a branch of medicine and surgery, which deals with the diagnosis and treatment of eye disorders. Ophthalmologists are experts in the diseases, functions, and anatomy of the eye. They may provide routine care such as vision testing, as well as prescribe and fit eyeglasses or contact lenses. However, ophthalmologists are also surgeons. They repair traumatic injuries to the eye and perform cataract, glaucoma, and corneal surgery.

An expert in his field, Dr. Economou has been the recipient of several awards and honors throughout his fruitful career, including Patients' Choice Award (2016, 2017, 2018, 2020), Compassionate Doctor Recognition (2016, 2017, 2018, 2020), and On-Time Doctor Award (2020).
