

Apponix Technologies launches free online foundation courses for high demand technologies

Bengaluru, Sep 13, 2020 ([Issuewire.com](https://www.issuewire.com)) - The COVID-19 outbreak has closed down businesses and left many out of work. With fewer jobs than ever to go around, graduates need to do everything they can to stand a chance in the job market. Training is key, and this is why Bangalore-based institute Apponix Technologies has stepped up to help.

Back in March, the company launched a series of free e-learning foundation courses for graduating students and job seekers. These online classes are delivered by senior IT professionals and focus on some of the world's top trending technologies. Students can gain a grounding in areas such as data science, machine learning, mobile app development and cyber-security, giving them the best possible chance of securing work in the future.

Apponix CEO Praveen Halakurki explains the thinking behind the courses:

"As the coronavirus pandemic creates an alarming situation across the globe, we have stepped forward to combat Covid-19 by offering free online foundation courses on high demand technologies for all graduating students and job seekers. We hope that these will help them to gain knowledge on multiple technologies."

Unsurprisingly, the online courses have proved extremely popular. As well as gaining essential skills, participating students also receive a free e-certificate. In the last four months, Apponix has provided free classes to over 10,000 students. The feedback has been highly positive, with 97% of students saying that they have learned a lot from the Apponix courses.
