

BNS Token Listed on XT.COM for Further Development

New York City, Sep 17, 2020 (IssueWire.com) - BNS is an upcoming multi-protocol utility token by Bitbns, which aims at enabling general masses to use cryptocurrency just like they use FIAT currency in day-to-day transactions. Beyond founding the basic utility of a cryptocurrency as money, BNS would also be capable of being used in complex operations like Banking, Loan Disbursals, Cryptocurrency Investments, and more.

Six reasons to choose BNS.

Instant

Transactions made via BNS would always be instant. Our conversion algorithms are right in place and ensure instant transactions is exactly what you experience.

Offline and Online

Internet is vast, but it may not be everywhere. Apart from its online utility, BNS would be capable of making offline transactions as well via Bitbns PAY debit card.

Ubiquitous

Pay with BNS, wherever you go. It's the cheapest and will always be.

Secure

Unlike other tokens, BNS is secure. Security is paramount in financial matters and we understand that.

Associated Rewards

Credit cards bring you loyalty points that are difficult to encash. BNS avails you instant discounts, then and there.

Low Fee

There's no point in creating a token that charges you as much as convenient payment options. That's why BNS promises the least fee per transaction, always

Simple and straight, BNS brings you the power to spend your cryptocurrency funds for bill payments, shopping, banking, and even international remittances. And that ... is just the beginning.
