

ChainTrail Blockchain Data-Interchange enters Malaysia

ChainTrail60, the local Malaysia based Data-Interchange makes it possible for Malaysian entities to create inter-party trust in data issued in Malaysia while making it globally transactable

Kuala Lumpur, Sep 30, 2020 ([Issuewire.com](https://www.issuewire.com)) - ThynkBlynk Technologies Sdn. Bhd., a ThynkBlynk Global company, creators of ChainTrail Blockchain powered data interchange, announced today deployment of their Malaysia hosted Blockchain Data-Interchange, ChainTrail60.

Malaysia joins the wide network of ChainTrail's global network with local ecosystems present in the United States, United Kingdom, European Union, United Arab Emirates, India and Singapore (in progress).

ThynkBlynk graduated from Microsoft's BizSpark start-up program in 2019. Recently, ThynkBlynk was declared the winner of Innovation Challenge by Novartis. Currently, ThynkBlynk has clients in the Middle East, Asia and North America.

"We are very excited at the prospect of working with Malaysian businesses, institutions, GLCs and Government. This move reflects our long-term commitment to Malaysia. Most importantly, with ChainTrail60, we hope to accelerate Blockchain innovation locally by partnering with Start-ups as well as enterprises who want to build real-life solutions with zero capital risk and in a very short span of time" said Parag Jain, Global CEO & Co-Founder of ThynkBlynk Technologies.

ChainTrail Data-Interchange makes it possible for Malaysian-origin data to be hosted and managed locally in compliance with Malaysian Personal Data Protection Act 2010 while ensuring global

transactability and 100% reliability. ChainTrail has innumerable use-cases be it Education Records, Health Records, Contracts, Invoices, Supply-Chain Records, Employee Records and many more.

About ThynkBlynk's ChainTrail

ChainTrail.com is Blockchain powered online Data-Interchange where reliable ecosystem participants together create inter-party Trust. This unique architecture keeps data local while making its validity global. Impossible to misrepresent data, ChainTrail enables verification of authenticity making it possible for private, public, government entities as well as regulators to participate transparently at a global scale.
