

## East Coast Herbalist Opens First Brick and Mortar Store in North Smithfield, RI

**North Smithfield, Sep 17, 2020 ([Issuewire.com](https://www.issuewire.com))** - Headquartered in Massachusetts, [East Coast Herbalist](#) has officially expanded operations to launch its first physical store in Rhode Island. The healthcare organization manufactures a wide variety of hemp-derived products, aiming to bridge the gap between the medical community and cannabis industry.

“I don’t think CBD, THC, or any of the compounds found in cannabis will replace pharmaceutical options, but it can augment them,” said Jeremy West, co-founder of East Coast Herbalist. “It can be used in conjunction with and can help people be less reliant on opiates and other medications.”

East Coast Herbalist offers an extensive selection of products ranging from tinctures and salves to lotions, flower, and edibles. Full spectrum products are available that contain under 0.3% THC as well as Broad Spectrum or CBD isolate options that do not contain THC, the ingredient that produces a sensation of euphoria. All products are third-party lab tested, compliant with the 2018 US Farm Bill, and

federally legal without a prescription or license.

Their manufacturing facility in southern Vermont is a cGMP laboratory to ensure safety, compliance, and efficacy. The company utilizes certified organic hemp sourced from local farmers. Each step of the process is closely monitored from seed to shelf to ensure the highest level of purity and potency. East Coast Herbalist works closely with partners within the medical field to gain access to the most current research literature and data related to cannabis medicine.

With so much misinformation about hemp products circulating, the founders believe it's important for individuals to have access to the most reputable information. Even those that have experience with hemp products may have questions and East Coast Herbalist provides free consultations in the store, by phone, email, or via the company's social media channels.

The launch of East Coast Herbalist's new store in North Smithfield, RI provides individuals with access to high-quality hemp products. The company's wide array of products, formulations, and cannabinoids ensure that there's a solution for the needs of every individual.
