

Ernest Buberman, DC, BA, a Chiropractor in private practice

Get to know Chiropractor Dr. Ernest Buberman, who serves patients in Brooklyn, New York.

New York City, Sep 10, 2020 ([Issuewire.com](https://www.issuewire.com)) - Dr. Buberman is a patient-oriented and experienced chiropractor in Midwood of Brooklyn, New York who also serves the General Manhattan area. Since 2002, he has offered personalized and compassionate care to patients dealing with musculoskeletal injuries from auto accidents, workplace injuries, and personal injuries through chiropractic care and rehabilitation.

Caring deeply for his patients' health and well-being, he works with them to ensure they receive the best care possible in a timely and efficient manner. He specializes in the treatment of lower back pain, neck pain, and whiplash through conservative, evidence-based methods.

Beginning his studies at Long Island University in Brooklyn, Dr. Buberman earned his Bachelor of Arts (BA) degree in Industrial and Organizational Psychology in 1997. He then attended Cleveland University-Kansas City in Overland Park for his Doctor of Chiropractic (DC) degree. Upon completion of his degree in 2002, he returned to Brooklyn and opened his private practice.

Over the years, Dr. Buberman has engaged in many entrepreneurial efforts within health care, financial services, business development, management, and leadership. He brings these experiences to his practice to provide patients with seamless care, case management, and communication between his patients and their attorneys or insurance claims adjusters when needed. In 2016, he completed additional studies to become a registered nurse (RN), which allows him to provide supplemental services to his chiropractic and rehabilitation patients.

Chiropractic is a form of alternative medicine that mainly deals with the diagnosis and treatment of mechanical disorders of the musculoskeletal system, especially the spine. A chiropractor uses spinal adjustments, manipulation, and other techniques to manage patients' health concerns, including neck pain and back pain. They aim to improve patients' functionality and quality of life by properly aligning the body's musculoskeletal structure and enabling the body to heal itself without the use of medication or surgery.
