

Geoffrey M. Crimmins, MD, an Interventional Cardiologist with Austin Heart - Cedar Park

Get to know Interventional Cardiologist Dr. Geoffrey M. Crimmins, who serves patients in Cedar Park, Texas.

New York City, Sep 10, 2020 ([Issuewire.com](https://www.issuewire.com)) - With a focus on interventional cardiology and peripheral vascular interventions, Dr. Crimmins considers communication to be a vital part of the doctor-patient relationship. At present, he works at Austin Heart - Cedar Park, which is the largest provider of cardiac and vascular services in Central Texas.

The interventional cardiology team at Austin Heart is setting the standard in diagnosing and treating heart conditions such as valvular heart disease, congenital heart disease, coronary and vascular artery disease, and vein disease. They perform approximately 3,000 interventions per year and offer the most advanced treatment options available, including leading diagnostic procedures and new minimally invasive interventional cardiology techniques.

Before embarking on his professional journey, Dr. Crimmins earned his medical degree from the University of Massachusetts Medical School in 2005. He then went on to complete his residency in internal medicine at Barnes-Jewish Hospital. This was followed by fellowship training in cardiovascular disease and interventional cardiology at William Beaumont Hospital, Royal Oak.

Among the doctor's most notable achievements, he is board-certified in internal medicine and cardiovascular disease by the American Board of Internal Medicine, a physician-led, non-profit, independent evaluation organization driven by doctors who want to achieve higher standards for better care in a rapidly changing world.

Setting a good standard of care, Dr. Crimmins is affiliated with St. David's Heart & Vascular, PLLC, St. David's Medical Center, St. David's Round Rock Medical Center, and Cedar Park Regional Medical Center.

Interventional cardiology is the subspecialty of cardiology that deals specifically with the catheter-based treatment of heart diseases. The field includes the diagnosis and treatment of coronary artery disease, vascular disease, and acquired structural heart disease. An interventional cardiologist is a cardiologist with one to two years of additional education and training in diagnosing and treating cardiovascular disease, as well as congenital and structural heart conditions through catheter-based procedures, such as angioplasty and stenting.
