

Panaesha Capital B2B Model Has Received a Huge Acceptance in the Financial Market

After The Apex Court Lifted the Ban on Crypto Panaesha Capital B2B Model Has Received a Huge Acceptance

New Delhi, Sep 21, 2020 ([Issuewire.com](https://www.issuewire.com)) - India's first fintech company that has introduced the B2B model in the cryptocurrency industry, recently Panaesha Capital celebrated the 3rd Foundation Day on 17th September 2020. Having traversed 3 years of its existence, the year 2020 is significant for Panaesha Capital since it has expanded its network in almost all states and union territories of India. Working just like the NSE (National Stock Exchange) & BSE (Bombay Stock Exchange) model, the company has successfully created a network of 250+ franchises, 100+ freelancers, 50,000+ clients through its business model, and have 40+ satellite offices all around India.

At Panaesha Capital, a special webinar was held at 4.00 pm wherein Mr. Sandeep Phogat - Founder & CEO of Panaesha Capital has addressed all the franchisees and freelancers. In his welcome address, Mr. Phogat conveyed his gratitude & warm greetings on the occasion. He also briefly spoke about the company's corporate journey, roadmap, achievements, milestones, and how franchisees & freelancers can grow their wealth in the crypto universe.

"There are a lot of cryptocurrency exchanges in India or around the world that offer buying, selling or trading of cryptocurrencies to clients. However, there are limited business opportunities in the crypto market. This is why we have introduced our B2B business model, enabling businesses and individuals to start their own successful trading business in the crypto market," said Mr. Sandeep Phogat in the webinar.

Partnership firms, limited liability firms, corporate bodies, or individuals can be the part of our Business Model as a Master Franchise, Franchise, and Freelancer and get access to India's fastest and growing

trading platform while enjoying up to 60% revenue share. Initially, due to the RBI's ban, we didn't get the response that we had expected but after the Apex court lifted the ban our business model has been welcomed by the investors or business with open hands.

The introduction of our B2B Franchise Model is not only opening a new door of business opportunities but also prove to be the right step to regularize cryptocurrency trading and investment in India. Our B2B franchise business model has supported hundreds of franchisees and thousands of clients to grow financially in today's tough economic scenario.

Even in the pandemic, we have been successful in achieving around ₹ 30 Billion trading volume in a month. Moreover, we have been successful in creating jobs and investment opportunities in the Indian crypto market and it will surely increase by continued innovation in the crypto world.

Crypto is the future of finance. I am confident that India will follow the footstep of developed countries like the USA, Japan, UK, Australia, and so on to regularize it as an investment option, and with our unique B2B franchise model it is quite easy to achieve", he further added.
