

plotch Ecommerce ERP Launched in India

plotch is ecommerce ERP for small businesses which is helping them grow their online business manifold

Mumbai, Sep 22, 2020 ([Issuewire.com](https://www.issuewire.com)) - plotch, an AI-driven [ecommerce ERP](#), was launched in India recently. plotch is a fully focused technology platform for online businesses and caters to almost all needs of an eCommerce business. plotch has been designed in a very scalable way using a modular architecture.

Using plotch, an eCommerce business can launch a shopping website and app in few minutes or connect to an already existing Shopify or Magento website. Once the order stream flows into the plotch platform, businesses can use plotch logistics module to ship products. plotch also has customer return and refund management, customer ticket management, chatbot for shopping, content management, warehouse management, supply management and payable management modules.

plotch also provides deep analytics for eCommerce businesses to identify sales trends, stock-outs, delayed dispatches, customer returns and customer RTOs. plotch can also be used as an [omnichannel platform](#) by using plotch POS which allows businesses to seamlessly manage customer carts, orders and shipping for online and offline stores.

plotch is easy to use and new businesses can [register for plotch here](#).
