New York City, Sep 19, 2020 ([IssueWire.com](https://www.issuewire.com)) - Dr. Rogers is a dentist currently practicing with Mt Rogers Dmd And Sp Rogers Dmd in Wayne, New Jersey. She has graduated with her Doctor of Dental Medicine Degree.

Her patients have excellent experiences with her, one stating, “Dr. Rogers has been my dentist for many years. She is absolutely the best! She is extremely knowledgeable and up-to-date on all current dental procedures and will give you honest answers to all of your questions. Her Wayne office is comfortable and welcoming and I wouldn't go anywhere else.”

To earn a Doctor of Dental Medicine Degree, students generally need a four-year undergraduate education. Afterward, they go to dental school for another four years of educational, clinical and dental laboratory training. After graduating with a Doctor of Dental Medicine Degree, dentists have to pass rigorous examinations. In the United States, dentists must pass the National Board Dental Examinations, which is a national written exam. They also have to pass a state exam to be licensed to practice there. With such extensive education and examination requirements, patients can rest assured that any dentist with a Doctor of Dental Medicine Degree is well qualified.

General dentists provide a wide array of services that are vital to patients' continued health. These services include: preventive services, including helping to maintain good oral health by stopping disease before it takes hold in the mouth; restorative services, such as receiving timely and appropriate treatment when a problem is identified; as well as cosmetic services, including performing a range of cosmetic procedures, such as teeth whitening, cosmetic bonding, and even porcelain veneers. General dentists also address overall health concerns as oral health is seen as the mirror of general health. In fact, some dental problems may reflect issues in other parts of the body and vice versa.
