

Use Vehicle Shipping for College Move-Ins

Chicago, Sep 18, 2020 ([Issuewire.com](https://www.issuewire.com)) - A new school year has officially begun and that means scores of students returning to college campuses. For many, this means moving back into campus dorms and apartments. Lugging countless boxes of personal belongings is challenging enough without figuring out how to get cars moved as well. [Nexus Auto Transport](#) can help with relocation through vehicle shipping services so that parents and students can focus on other items on the moving task list.

Nexus Auto Transport is a leading vehicle shipping company with extensive experience in helping customers get their vehicles from one point the next without the hassle of coordinating different drivers. With so many students finally returning to brick-and-mortar schools, Nexus offers a solution to make the transition smoother. Auto shipping is especially convenient in the current environment, where students are limited to fewer people helping with dorm move-ins.

Booking auto transport is simple with Nexus: customers can call for a quote, provide essential shipping info, choose a time and date and the company takes care of the rest. Customers can use the online car shipping calculator for an idea of cost and enjoy extensive shipping availability even throughout the busiest times of the year. Nexus employs professionally certified truck drivers to ensure safe and on-time vehicle shipping.

Customers can choose from three options for vehicle shipping: economy, which is the least expensive

option for pick-up between one and five business days; standard, which is ideal for those with a specific schedule in mind with pick-up between one and three business days; and expedited, for those that require a fast turn-around with pick-up the same or next day.

Nexus Auto Transport also offers the option to ship multiple vehicles at a discounted rate. Clients are never asked to pay the full price of transport upfront and can book transport with just a deposit. The delivery process is seamless. To start, customers are strongly encouraged to remove personal effects from the vehicle before transport. Doing so not only ensures personal item protection but also, keeps loose items from being jostled around the vehicle during transport. Those items left in the car should be stored properly to guard against damage as the vehicle is moved.

Upon pick-up, the driver and client will conduct a full inspection of the vehicle to note any existing damage. Customers will then inspect the vehicle again with the driver upon final delivery, after which they will complete the transaction. This step-by-step approach is the way that Nexus ensures complete customer satisfaction with the transport.

Vehicles do not have to be in working order for transport. This means that those students with vehicles that need a bit of work can still transport it back to campus and then deal with mechanical needs later.

Nexus ships vehicles of any size, shape, make, or model, including pick-up trucks and SUVs. This is the benefit of working with a company that has a nationwide transport network, as it means that no matter what kind of vehicle customers want to be transported, Nexus can help.

College [Move-ins](#) can be stressful enough without figuring out how to get a car moved along with everything else. This is especially true given the uncertainty of the 2020 fall semester, so any way that campus move-ins can be simplified is ideal. Tasks associated with the move that parents and students can check off the list means more quality time before classes begin.

Check one thing off the list with a quote from Nexus Auto Transport. The company will handle the logistics of vehicle shipping and help make the moving transition an easier one.
