

## BeeRemote is the perk employees really need right now

Stated as one of the best startups founded during Covid-19 and “The key to remote working”.

**New York City, Nov 1, 2020 ([IssueWire.com](http://IssueWire.com))** - Remote work is not a new trend, it has been rapidly picking up in the last decade. Covid-19 only forced even the most traditional companies to operate in a remote manner and it didn't take them long to realize the benefits of distributed & remote teams.

In recent years many surveys indicated remote work is the most sought after perk or benefit by millennials.

[BeeRemote](#) provides access to over 700 coworking spaces globally, allowing companies all over the world to work anywhere in an environment conducive to their continued success.

This revolutionary new perk help companies retain top talent while ensuring employees are properly equipped with the resources needed to complete their work.

“Our goal is to simplify remote working and make it accessible to all.” Says a Gabriel Nimrod, CEO and Co-founder of BeeRemote.

About providing such a solution for companies, Gabriel added: “The world is experiencing right now the telecommuting revolution. It will affect both personal life and business behavior. Millions of people around the globe learn how to work remotely. Companies will adapt to the new reality and will be challenged to maintain goals and efficiency while letting employees work remotely. We believe that BeeRemote will enable employees to balance their professional and personal goals while keeping high productivity.”

*Remote work is becoming increasingly prevalent, with 66% of companies allowing remote work, not to mention the legions of people working for themselves, entirely on a remote basis. With increasing globalization, skill specialization and agile team models, the workforce will change exponentially in the next 10 years, with more than half of the workforce working remotely.*
