

Bestyn, The Mobile Social Media App For Neighbors, Officially Launches In App Stores

The logo for Bestyn, featuring the word "BESTYN" in a stylized, white, blocky font against a solid purple rectangular background.

Los Angeles, Oct 12, 2020 ([Issuewire.com](https://www.issuewire.com)) - Bestyn, a multifunctional app that makes it easy for neighbors to connect, share information, and collaborate, this week officially went live for download in the App Store and Google Play Store.

With this intimate app designed to be a social media marketplace for neighbors located in the same communities and enclaves, Bestyn ensures users will never miss local events like garage sales, birthday parties, charity events, and more serious community events, like death or accident.

“Many people don’t realize their new best friend, partner, or even business investor could be living right down the road from them,” said Maria, Founder, and Owner of Bestyn. “Some of our best resources are right in our neighborhood, which is why we made Bestyn. Using this social media app, now anyone can stay active in their community by organizing events, spreading information, and uniting the people around them.”

Containing a Bestyn Business Profile for those looking to make posts, advertising services, and growing their businesses, the Bestyn app can be leveraged by local, small businesses working to advance their brand today. Additionally, users can publish events at their leisure to ensure their gathering, celebration or announcement is publicly known.

Bestyn also provides real-time reporting of nearby suspicious activity or crimes in the region, keeping neighbors safe.

“Designed intuitively to respond to user requirements and requests, Bestyn is jam-packed with business, safety, and personal features,” said Maria. “We have even more great features that are going to be added to our next version. For those looking integrate further into their community, download Bestyn today!”

Bestyn tracks app user interests so it is able to provide the most relevant information in the app home feed.
