

DTI SH-85 Stuns The Flooring Industry

Los Angeles, Oct 16, 2020 ([Issuewire.com](https://www.issuewire.com)) - DTI Coatings and Supplies has introduced a new industry changing product called DTI SH-85. A demo of this product, with Michael Cavanaugh as the demonstrator, has surfaced online. The features of this new product will change the flooring industry as being able to finish faster, without losing quality. The product also is moisture tolerant and will cure in water as seen in the video. Instead of just accepting the moisture like similar products that fail to meet industry standards; the DTI SH-85 displaces the water and rejects it to allow for maximum bonding to the walls of the substrate. As the decorative concrete and coatings industry evolves, materials used for the processes must evolve as well. DTI prides itself in being at the forefront of that evolution, by giving the newest, best products; at fair pricing for all.
