

Fasteners & Corrosion: The Facts

New whitepaper addresses selection of materials, designs, and coatings to fight corrosion issues.

Arlington, Nov 3, 2020 ([IssueWire.com](http://www.IssueWire.com)) - Fasteners & Corrosion: The Facts

Each year, the effects of corrosion take a staggering toll on the global economy – the equivalent of 3.4% of global GDP.

All-Pro Fasteners, Inc. today announced an offering a free download of a new whitepaper, *Fastener Corrosion: Avoiding Problems in Advance*. The whitepaper discusses the leading causes of corrosion, various types of corrosion, and strategies for minimizing or avoiding corrosion through the selection of fastener materials, designs, and coatings.

“This is the first whitepaper in our new Fastener Facts series, which we are developing to help customers, engineers, project managers and purchasers involved in the fastener specification process,” according to Todd Grzych, Director of Marketing and Communications of All-Pro Fasteners.

Features of the article include.

- causes of corrosion
- various types of corrosion

- strategies for minimizing or avoiding corrosion through the selection of fastener materials, designs, and coatings

To download the free whitepaper, visit www.apf.com/fastenerfacts.

About [All-Pro Fasteners, Inc.]: All-Pro Fasteners, Inc. has combined distribution capabilities, expansive international supply chains, product experts and dedicated staff support to establish a track record of success and persistent industry growth. Founded in 1976 to be a full-line, full-service fastener distributor for the oil and gas industry, we've expanded into a variety of market segments to make APF a leading solutions provider.
