

Fivebalance Is a Crypto Startup targeting depression and aimed at self-improvement?

Fivebalance is a crypto startup company that has developed a unique self-improvement application.

Singapore, Oct 6, 2020 ([Issuewire.com](https://www.issuewire.com)) - Fivebalance is a crypto startup company that has developed a unique self-improvement application with the same name available on top digital distribution platforms and intends to serve people dealing with depression by rewarding them with FBN cryptocurrency on achieving their personal customized goals in 5F categories (Fit, financial, Family, Flair, and Faith). The users can now experience updated block chain and wallets on all four main operating systems.

Depression and mental health problems are no longer trivial issues and are very prevalent in people of all ages worldwide. According to WHO, depression is a leading cause of disability and has a life-altering

effect. Severe depression can result in suicide, a leading cause of death in teenagers and people in their twenties. Depression is caused by a complicated interaction of social, psychological, and biological factors. Still, the condition is manageable by personal efforts, proper guidance, and using prevention techniques. It can lead to self-improvement, and everyone dealing with the situation can live a dignified life. Fivebalance is an effort to support all these people who desire to have a prosperous, productive life.

Introduction to Fivebalance:

[Fivebalance](#) is a unique crypto startup company and a premier digital asset for human resource development. This self-improvement platform is designed for people striving to fix their problems and enhance the quality of life. The application facilitates the users to record their performance in five distinct categories like Fit, Financial, Family, Flair, and Faith. The users are allowed to customize their own goals in all these categories and are entitled to receive rewards on completing the objectives.

FBN and It's Uses:

Fivebalance Coin (FBN) is a crypto currency designed to reward the users who are achieving their goals, which will boost their motivation to stay on the right track towards self-improvement. The platform uses a KPI calculation method, and users are allowed to create, choose, and share their targets and accomplishments in the form of KPI score with other users on the platform. This will encourage other users and inspire them to work hard to achieve their self-improvement goals. The users with high KPI scores will receive FBN rewards from other members and advertisers on the platforms. FBN could be used to unlock premium indicators of high performers, or users can reimburse the [crypto](#)currency to get access to the seminars and eBooks. FBN could also be utilized to purchase merchandise on the platform. All the revenue will be added to the user's wallet, and the developer will charge a minuscule fee in the form of the coin.

Key Features of the application:

The application is user friendly and is designed to facilitate people all over the world. The key characteristics of the application are

- The application has a personal key performance indicator that allows its users to quantify their achievements and easily share it with other members on the platform.
- The users are rewarded with cryptocurrency rewards for their achievements at the end of every month.
- The use of cryptocurrency is to facilitate global users and to avoid hefty bank transfer fees. We have updated our new block chain and Mac, Windows, and Ubuntu Wallets for enhanced user experience.
- The app allows its users to connect with people with similar objectives so they can inspire each other and work together towards their self-improvement goals.
- The users can find numerous [self-improvement](#) articles updated regularly to improve their performance in the 5F categories.
