

## **Hector O. Campbell, MD, a Plastic and Hand Surgeon with Northern Light Eastern Maine Medical Center**

Get to know Plastic and Hand Surgeon Dr. Hector O. Campbell, who serves patients in Bangor, Maine.

**New York City, Oct 18, 2020 ([Issuewire.com](https://www.issuewire.com))** - Dr. Campbell is a well-respected, fellowship-trained Plastic and Hand surgeon with Northern Light Eastern Maine Medical Center in Bangor, Maine.

When it comes to Plastic and Hand surgery services, Northern Light Eastern Maine Medical Center has been all hands on deck since 2005. It offers a wide range of services for treatment of general and

reconstructive hand and wrist problems, as well as general, reconstructive, and cosmetic plastic surgery services for problems that arise from head to toe.

The doctor's acclaimed career in medicine began after he earned his medical degree from the University of the West Indies in 2001. He then went on to complete a residency at Cornwall Regional Hospital in 2006. This was followed by two residencies in General surgery and a residency in Plastic surgery at Detroit Medical Center/Wayne State University in 2013, and 2016 respectively. A year later, in 2017, he completed a fellowship in Hand surgery at the University of Toronto/Toronto Western Hospital.

Thriving in his field, Dr. Campbell is board-certified in Plastic surgery by the American Board of Plastic Surgery (ABPS). The mission of the ABPS is to promote safe, ethical, efficacious plastic surgery to the public by maintaining high standards for the education, examination, certification, and continuous certification of plastic surgeons as specialists and subspecialists.

Plastic surgery is a surgical specialty involving the restoration, reconstruction, or alteration of the human body. It can be divided into two main categories - reconstructive surgery and cosmetic surgery. A Plastic surgeon's primary responsibility is performing surgical and non-surgical procedures, and they use a variety of reparative and reconstructive techniques to get the job done. Dr. Campbell enjoys complex reconstructive cases.

Hand surgery deals with both surgical and non-surgical treatment of conditions and problems that may take place in the hand or upper extremity (commonly from the tip of the hand to the shoulder), including injury and infection. Hand surgeons are orthopaedic, plastic, or general surgeons who have additional training in surgery of the hand. They care for these problems with and without surgery. They are specially trained to operate when necessary.
