

Looking for www.norton.com/setup?

Broussard, Oct 8, 2020 (Issuewire.com) - Norton.com/setup – The demand and use of web-based services are increasing day by day, but most of the users are unaware of cyber threats and malicious sites. To protect yourself from the dangers of malware, you should get Norton. Users can easily reach the website of Norton at **www.norton.com/setup**. Get your system protected through **Norton setup** using 25 digits of product key by selecting your desired subscription.

What is Norton Product Key?

Norton setup can be accessed through the site: **Norton.com/setup**. One can use the product code to activate the subscription. The product code is a complete set of activation keys used primarily for two purposes:

- **Renewal of a product**
- **Activation of Norton Subscription**

The product key is divided into five distinct sections, and each section comprises five secured digits. These sections are divided by the sign of hyphen.

How to Create a New Norton Account?

If you desire to create a Norton account, follow these straightforward guidelines:

- Firstly, use the Norton web-link that is **norton.com/setup** to reach the homepage.
- Then, hit the Sign-Up option there. This tab opens a form for account creation. Fill the details and proceed.
- After that, you will be requested to create your username and passcode. Do the same and hit the Continue button.
- Then, tap the Next tab there. Follow onscreen instructions carefully.
- Once you are all set, sign in and download the setup.

How to Get the Norton Setup Downloaded?

If you are a new user, then tap the Sign-Up button to create your Norton account otherwise use the link: [Norton.com/setup](https://norton.com/setup) to login into your Norton account to get the setup downloaded. One can use these guidelines to download the **Norton setup**:

- First of all, reach the web page of Norton.
- After that, sign-in to the Norton account.
- Then, press the Get Started button there.
- Next, tap the subscription plan that you wish to download.
- Now, choose the device type option.
- After that, accept the terms and conditions section by hitting the Agree button.
- Wait for a little for the downloading procedure to wrap
- Once the download completes, move towards the installation guidelines written below.

How to Get the Norton Setup Installed on Your Device?

After downloading the setup, you need to install it by tapping the downloaded file accessed via the Downloads folder.

- Firstly, double click on the downloaded file of Norton.
- Then, wait for the installation prompt to appear.
- Once it appears, tap the Install Norton option. Usually, Norton automatically installs once applying the double-click on the downloaded setup.
- Now, agree with the terms and conditions section of Norton.
- You may use the appropriate checkbox for the auto-renewal process.
- If asked for confirmation, tap the Yes button and proceed.
