

Outdoor Display System: A fresh take on exhibitions

London, Oct 12, 2020 ([Issuewire.com](https://www.issuewire.com)) - At the iconic Coal Drops Yard in London, you'll currently find the latest version of an innovative gallery-style display system from [Outdoor Display System](#). With the events industry having ground to a halt this year, Outdoor Display System has responded with a fresh take on what exhibitions can look like during a global pandemic.

The concept is simple: find your perfect location - whether that's an historical landmark like London Bridge or an area of outstanding natural beauty like Cornwall - and use Outdoor Display Systems to host a fresh-air exhibition somewhere you've never before thought possible.

The system can be assembled within a few hours so your striking event can easily pop-up wherever you choose. With no permanent fixtures needed, the exhibition can then be completely removed without a trace once it's finished.

While we might not be any closer to the normality of spending leisurely afternoons browsing art galleries, this approach from Outdoor Display Systems means you can get right back to hosting the events you care about.
