

SchoolCues Launches The First Ever COVID-19 Screening App for Small Schools

The image shows a smartphone screen with the 'Check In Screening' app. The status bar at the top shows 'AT&T', '3:16 PM', and '37%' battery. The app has a purple header with a back arrow and the title 'Check In Screening'. Below the header, the date 'August 12, 2020' is displayed. The first entry is for 'Armstrong, Christopher'. It features a minus sign icon, two checkboxes labeled 'TEMP NOT OK' and 'TEMP OK', a temperature input field with a degree Fahrenheit symbol, and two buttons: 'NOT ADMIT' (red) and 'ADMIT' (green). The second entry is for 'Armstrong, Neil', with identical controls. At the bottom, there is a dark blue button with a document icon and the text 'ACCESS FORM'.

 ACCESS FORM

Phoenix, Oct 13, 2020 ([IssueWire.com](https://www.issuewire.com)) - SchoolCues (www.schoolcues.com), the leading low cost all-in-one school management system for small schools, has recently launched their much anticipated COVID-19 screening app, the first of its kind for small schools, for both IOS and Android. Exclusively serving small schools with limited budgets for over 10 years now, SchoolCues has simplified and automated the screening process to screen entrants for any health symptoms before they enter the building.

The COVID-19 screening app uses mobile QR code technology with an intelligent user interface for the parents, students and administrators to efficiently manage the check in and check out process. The user-friendly interface reduces the check in time by over 50% and significantly reduces the school's operations cost of managing paper intensive manual processes.

The touchless mobile COVID-19 screening app is tailored towards small schools to help them create dynamic and customized check-in/check-out screening forms. These electronic forms are available for easy access on both the SchoolCues desktop and mobile app.

The SchoolCues Covid-19 screening app comes with many powerful features

- QR code scanning for tracking form submissions
- Mobile temperature scans
- Electronic signatures
- Dynamic custom form creation in minutes
- Custom forms for different audiences (ex. Kindergarten, Staff, Middle School, High School)

- Tracking submissions on a real time basis
- Comprehensive report management features to generate custom reports for submissions, non-submissions and aberrant response reports
- Notifications and alerts to notify administrators on aberrant responses and non-submissions

These features help facilitate paperless pre-screening and touchless check-in, ensuring the safety of school personnel in small schools.

Upcoming Features

- Integrate mobile QR Code check-in to track daily attendances
- Mobile payments with check-in/check-out to help schools process cashless transactions
- Mobile donations management and school fundraising

About SchoolCues
