

Silicon Valley startup offering promotion for their cinema-grade 4K projectors from just \$299

4K Home Cinema

					
True 4K Display	3500 Lumens Brightness	3D Movie Function	Built-in Entertainment	Google Play Store	Free Gifts Included

San Francisco, Oct 30, 2020 (Issuewire.com) - [Peak Projector](#) is a US tech success story. When our media team spoke to Nicholas, the founder of Peak Projector, he recalled the incredible story of his startup journey. After moving to California from a major city, he was surprised that movie theatres are far from residential areas!

As movie theatres reopen during the pandemic, many casual moviegoers are concerned about their health and safety protocols. So he made it his personal mission to bring the cinema experience to your home at a ridiculously affordable price.

Peak Projector dominates the marketplace with 2X the power and functions of similar price point projectors. The company now offers their projectors at a massive discount up to 60%, [Peak DUO at](#)

[\\$299 \(originally \\$649\)](#) while [Peak Pro at \\$399 \(originally \\$997\)](#). Their projectors can even be compared to big giants Sony, Philips and JBL projectors.

Built with cutting edge technologies and high-grade materials, they offer an affordable price for 4K UHD cinema-grade projectors. To achieve this, they do away with the middleman and sales team which would be significant to a startup especially being located in California.

In terms of specifications, it's packed with tons of power and features for a device that cost less than \$300-\$400. Bear in mind that this is a 4K projector with Dolby sound surround system. It offers unlimited entertainment with Netflix, YouTube and Spotify built-in right out of the box! It has a brightness of up to 4500 lumens and 2000:1 contrast ratio.

We've said enough, it is time for you to try out their products and let the features speak for itself! From the interview, we understood that this promotion will cease soon. So do whatever it takes to get your hands on this amazing cinema-grade 4K resolution projector. For every purchase, it comes with a 1-year comprehensive warranty and 30 days return policy - so there's no harm trying out the product to see if it fits your needs.
