

Susie Clayton, RN, a Registered Nurse with Greenleaf Behavioral Health Hospital

Get to know Registered Nurse, Susie Clayton, who serves patients in Valdosta, Georgia.

New York City, Oct 22, 2020 ([IssueWire.com](https://www.issuewire.com)) - A graduate of Abraham Baldwin Agricultural College, Susie is a registered nurse specializing in behavioral health, dialysis, and medical-surgical nursing. She works at Greenleaf Behavioral Health Hospital in Valdosta, Georgia.

Greenleaf Behavioral Health Hospital is a 113-bed behavioral health and substance abuse treatment hospital located in the heart of South Georgia. It offers inpatient hospitalization, partial hospitalization, and intensive outpatient programming for adolescents, teens, and adults struggling with depression, anxiety, bipolar disorder, behavioral issues, and other mental health illnesses.

The inpatient treatment programs are for adolescents (ages 12-17) and adults who are a danger to themselves or others and require intensive observation and stabilization. The staff focus on making sure each client creates a strong foundation that sets the stage for a successful recovery.

The basis of the outpatient programs is to provide group therapy to adults. Clients engaged in partial hospitalization and intensive outpatient programs typically stay in treatment for 2-4 weeks, depending on the specific needs of the individual.

A Registered Nurse (RN) is a nurse who has graduated from a nursing program and met the requirements outlined by a country, state, province or similar licensing body to obtain a nursing license. RNs fulfill a variety of job duties. In addition to their primary role in treating and caring for patients, their responsibilities also include educating patients and the public about a variety of medical conditions, as well as providing emotional support and advice to the families of their patients. Other RN job functions include leadership, research, performing diagnostic tests and analyzing results, operating medical equipment, administering medications, recording patients' symptoms and medical histories, and assisting with patient rehabilitation and follow-up.
