

Swapfolio App sneak peek: The company releases the Alpha version of its cryptocurrency trading app and portfolio manager

SWFL Technology, the SaaS (Software as Service) cryptocurrency company behind the Swapfolio project, has launched an early-stage version of their Swapfolio App, a Decentralised Finance (DeFi) Trading Terminal and Portfolio Manager.

The image displays the Swapfolio app interface on both a laptop and a smartphone. The laptop screen shows a dashboard with a line chart for '7D PORTFOLIO GROWTH', a 'UNISWAP TRADE VOLUME' of 360k, and a 'TOTAL PORTFOLIO VALUE' of 16.137 ETH. Below this is a table of holdings:

ASSET NAME	TICKER	PRICE (ETH)	HOLDINGS	TOTAL	CHANGE (24H)
Ampleforth	AMPL	0.60215182	2,699 AMPL	5.8088 ETH	+ 12.99%
Compound	COMP	0.34503278	12 COMP	4.1401 ETH	+ 20.71%
Yearn.finance	YFI	10.23487262	0.33 YFI	3.3775 ETH	+ 13.62%
Chainlink	LINK	0.62381831	118 LINK	2.8185 ETH	+ 51.34%
1inch Protocol	BZRX	0.00996029	-	-	- 7.93%
MakerDAO Governance	DG	0.00308547	-	-	+ 39.12%
Swapfolio	SWFL	0.00043859	-	-	+ 17.52%

The smartphone screen shows a similar interface with a line chart and a 'TOTAL PORTFOLIO VALUE' of 16.137 ETH. The Swapfolio logo and tagline 'UNISWAP MADE EASY' are prominently displayed at the top of the app interface.

www.swapfolio.app

company behind the Swapfolio project, has launched an early-stage version of their Swapfolio App, a Decentralised Finance (DeFi) Trading Terminal and Portfolio Manager.

This Alpha version of the highly-anticipated *Swapfolio App*, <https://swapfolio.app/>, sets the visual tone and the technical foundations of the product that will help bring Uniswap trading to the masses.

Swapfolio's Head of UX is excited to be reaching this milestone in Swapfolio's unique and exhilarating journey: *"We wanted to showcase to our potential customer base the strong foundations of the project, so we can have an open conversation with them in which continuous feedback between customers and Swapfolio becomes the norm"*.

With a product roadmap projecting the product launch in Q2 2021, and a Beta release scheduled for December 2020, the company aims to carry on working on continuous integration, delivery & deployment methodology: Releasing plenty of new features and smaller updates constantly.

Swapfolio offers a safe staking model that rewards loyal supporters of the project. Remaining stakers receive bonuses from the staking and unstaking fees, and in the future, an additional bonus in the form of advertising fees. Swapfolio's Product Manager quoted that *"the strategy of growing a product based on user growth is not uncommon - however, Swapfolio follows that up by offering a matching staking model and continuously engaging with the community - listening and considering their demands in the design decisions"*.

Swapfolio's extraordinary following and online engagement confirm the impressive community support that exists towards this project, which aims to democratise Decentralised Finance. Its unique portfolio & trading terminal will enable users of all levels to trade effortlessly and safely, in a very easy-to-use dashboard.
