

Virima and T4S Partners Form Strategic Partnership

Deal Allows T4S to Deliver Virima's Best-of-Breed IT Discovery and Relationship Mapping Solutions

Atlanta, Oct 21, 2020 ([Issuewire.com](https://www.issuewire.com)) - Virima Technologies and T4S Partners announce a new strategic partnership to deliver market-leading technology and services capabilities in the areas of IT Asset Management (ITAM) and Service Asset and Configuration Management (SACM) solutions.

Today's leading organizations are very focused on improving their IT Service and IT Operations Management functions. Having made significant progress in the last 5 years, those organizations are aggressively pushing to increase their maturity levels. To accomplish this the right technologies and processes are critical. Automated Discovery, Dependency Mapping, Business Service Mapping along with processes that support the Asset and Configuration Management Lifecycles enable this type of progress.

With affordable solutions and integration options from Virima together with technical, process and solution expertise from T4S, IT organizations are able to address complex needs such as impact analysis to improve MTBF/MTTR; financial, regulatory audit and compliance requirements; hardware and software asset lifecycle management; and hybrid IT change configuration management.

"Increasingly our customers are recognizing the opportunity to drive improvements by addressing their SACM needs. We are consistently seeing an understanding that process and technology are critical. We are very excited about the partnership with Virima, as it expands what T4S can deliver to our clients" said Rob Ash, CEO and Managing Partner of T4S.

Mike Bombard, COO of Virima, added "We are very excited to add T4S to our growing list of specialized partners. They were a strong advocate and contributor to our recently released integration with Cherwell ITSM. Without a doubt, their clientele will benefit from T4S's consulting expertise and technical knowledge of both platforms to address key IT asset/ITSM related technology gaps."

Organizations seeking a standalone or tightly integrated IT discovery and service mapping ITAM/SACM solution should contact T4S Partners for a free expert consultation. Through this new partnership, T4S clients qualify for extended full-featured trials of Virima's SaaS-based software to ensure proper fit.

About Virima

Virima (Atlanta, GA) is an innovator of integrated IT Asset and Service Management solutions featuring advanced infrastructure discovery, automatic dependency mapping and ViVID™ business service maps. ViVID (Virima Visual Impact Display) incorporates ITSM functions such as Change and Incidents into dynamic asset relationship visualizations to accelerate risk, cause and impact analysis to increase MBTF and decrease MTTR. Organizations looking to improve IT service, operations, security, risk and compliance management would greatly benefit from Virima's affordable and easy to deploy SaaS solutions.
